Product Description

0.1 Liter Cookies and Baklava Tin Box

The 0.1 liter cookies and baklava tin box HF is a compact metal package designed to protect, present, and prepare small portions of cookies, baklava, and syrup-based desserts for branded sale. The HF mold has a diameter of 60 mm, a length of 95 mm, and a height of 22 mm. Its volume is 0.1 liter. The slip lid provides simple opening and closing while keeping a classic metal tin appearance. Manufactured by Kontensan, this model is suitable for sample products, single portions, premium treats, and gift presentations where brands need a small cookies tin or baklava tin with strong visual branding potential.

Key Features of the Cookies and Baklava Tin Box

Metal Food Packaging for Small Portions

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes subcategory. The available 0.22 mm, 0.24 mm, and 0.25 mm metal thickness options provide a balanced structure for a compact package. According to the technical sheet, the product has no seam or lock seam, seam coating, hole, handle, hinge, or bead. This simple structure gives small food portions a clean and controlled packaging form.

Practical Slip Lid

The 0.1 L model uses a slip lid. This lid type makes the package easy to open and close while keeping the traditional look of a metal tin. The compact format works well for boutique cookies, small baklava portions, Turkish delight, dragees, and tasting products. For wholesale cookie tin or gift cookie tin projects, it provides a practical choice for small-volume product lines.

Offset Printing and Coating Options

The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow printed baklava tins and branded cookies tins to carry brand colors, patterns, and graphics even on a small package.

Applications and Brand Value

The 0.1 liter cookies and baklava tin box can be used for small cookie portions, single baklava servings, Turkish delight, dragees, confectionery, tasting products, and corporate gift sets. Its compact volume combines portion control with a premium presentation format. Because the metal surface supports offset printing, even a small box can become an effective brand communication surface. The reusable metal body can also extend the life of the package after the food is consumed. Kontensan combines different lacquer and printing options with serial production capability, giving food brands a practical and visually strong packaging solution for small-volume products.

Frequently Asked Questions - FAQ

What are the dimensions of the 0.1 liter cookies and baklava tin box?

The product has a diameter of 60 mm, a length of 95 mm, and a height of 22 mm. Its volume is 0.1 liter, or 100 ml.

What type of lid does the box use?

This model uses a slip lid, providing simple opening and closing for small-volume food products.

Can custom printing be applied to the box?

Yes. Offset printing and different lacquer options can be applied to the outer surface, allowing the package to match the brand identity.

Which products can be packed in this tin box?

It is suitable for small portions of cookies, baklava, Turkish delight, dragees, confectionery, tasting products, and gift food packaging.
