Product Description

0.5 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can IA

0.5 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can IA is a 500 ml agricultural package with a seamed metal body. Manufactured by Kontensan, it belongs to the Industrial and Chemical Tin Cans, Pails, and Drums main category and the Agrochemical, Liquid Fertilizer & Seed Tin Cans subcategory. Its narrow body and aluminum easy-open lid option provide a design for packaging small volumes of agricultural products.

Technical features of the 500 ml agricultural container

The L404 model has a diameter of 73 mm, a height of 120 mm and a metal thickness of 0.24 mm. Both internal and external surfaces feature Gold lacquer. Its seamed body has no handle, reinforcing bead or separate filling hole. The aluminum easy-open lid provides direct access to the contents after opening. The mold family supports volumes from 0.1 to 1.1 liters. Metal thicknesses of 0.22 and 0.25 mm and open-top delivery can also be considered.

Coating selection for seed and agrochemical packaging

The internal coating is selected according to the properties of the agricultural product. Options include Gold, Silver, clear, pigment and double lacquer, along with different seam coating applications. The L404 configuration has no separate seam coating. For seed packaging, moisture and storage conditions should be considered. For agrochemical and liquid fertilizer packaging, chemical compatibility, closure performance and leak resistance are important. Suitability for liquids should not be assumed until relevant tests and transport requirements have been confirmed.

Custom printing for small-volume metal packaging

On a body with a diameter of 73 mm, the readability of the product name, brand identity and required usage information is important. Exterior options include enamel, different lacquers and metal offset printing. Kontensan combines its metal packaging experience since 1980 with printing and production facilities in Konya and Istanbul. Coating, printing and closure specifications are confirmed before ordering.

Frequently Asked Questions - FAQ

What are the dimensions of the 500 ml agricultural container?

The L404 model has a diameter of 73 mm and a height of 120 mm. Its metal thickness is 0.24 mm and nominal capacity is 500 ml.

How does the agricultural container open?

The L404 model features an aluminum easy-open lid. The lid should not be assumed to provide a leak-tight seal again after opening.

Can the 500 ml metal package be custom printed?

Yes. Metal offset printing and different exterior coatings are available. The final design is confirmed before ordering.
