1 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans Z5

Z5

Technical Specifications

Mold Code	Z5
Diameter	58
Length	115
Height	60
Volume	0.4 - 1.4 lt

Applicable Features

Kalınlık

0,24 mm · 0,25 mm · 0,22 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø24 mm · Ø32 mm

Kapak

Pratik 24 mm · Pratik 32 mm

Kulp

Yok

Kulp/Tapa Rengi

Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Yok

Dikiş/Kenet

Dikişli

Product Description

1 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans Z5

1 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans Z5 is a family of small metal containers for agrochemicals, liquid fertilizers and suitable agricultural products. Kontensan offers it within Agrochemical, Liquid Fertilizer & Seed Tin Cans under Industrial and Chemical Tin Cans, Pails, and Drums. The Z5 mold family covers capacities from 0.4 to 1.4 liters. The documented one-liter L588 model has a finished height of 180 mm, 0.24 mm sheet metal, a 32 mm opening and a Pratik 32 mm closure. Its welded metal body has no handle. The container should be assessed against the brand's filling and shipping needs.

Dimensions and Capacity of the One-Liter Agricultural Container

The Z5 mold family has a stated diameter of 58 mm and length of 115 mm. The family datasheet lists 60 mm in its height field, while the finished L588 model is 180 mm high. Therefore, 60 mm must not be presented as the finished height of L588. The family covers capacities from 0.4 to 1.4 liters, with available sheet thicknesses of 0.22 mm, 0.24 mm and 0.25 mm. L588 holds one liter and uses 0.24 mm sheet metal. It has no additional body shaping or ribs. When buying agricultural metal containers, distinguish the mold family's range from finished product dimensions. Filling lines, shipping cartons and pallets should be planned for the selected model.

Gold-Lacquered Surfaces and Pratik 32 mm Closure

The L588 model has gold lacquer on both its inner and outer surfaces. Its seam uses powder lacquer inside and lacquer outside. A 32 mm opening, Pratik 32 mm closure and green closure or plug color are specified for this version. The container has no handle. The Z5 family also lists a 24 mm opening with a Pratik 24 mm closure, different inner lacquer choices and offset printed exterior finishes. These are not all standard features of L588. When selecting agrochemical packaging or a liquid fertilizer container, check chemical compatibility between the product formulation, metal surface, lacquer and closure materials. Leak performance and any required transport approvals must be verified separately.

Wholesale Agrochemical Containers and Custom Printing

For agricultural packaging manufacturers, choosing a metal container involves more than volume. The closure, inner coating, printing area and order quantity also affect cost. Kontensan has manufactured metal packaging since 1980. Its facilities in Konya and Istanbul provide a combined 25,000 square meters of indoor production space. Metal offset printing equipment allows the company to evaluate custom printed agricultural packaging in suitable configurations. It exports to more than 30 countries. Wholesale agrochemical container prices may vary with sheet thickness, closure selection, lacquer and printing requirements, and order quantity. For a technical quotation, provide the chemical characteristics of your product, target capacity and required closure system.

Frequently Asked Questions - FAQ

What is the height of the one-liter agricultural container?

The finished L588 model is 180 mm high and uses 0.24 mm sheet metal.

Which closure and inner coating does this container use?

L588 has a 32 mm opening, a green Pratik 32 mm closure and gold lacquer on its inner surface.

Can agricultural metal containers be custom printed?

Offset printed exterior finishes are available in the Z5 family. Printing and chemical compatibility must be confirmed for L588.
