Product Description

0.5 Liter Paint & Thinner Tin Can IA
0.5 Liter Paint & Thinner Tin Can IA is a welded, handle-free metal packaging solution for paint manufacturers requiring small

containers. Kontensan offers it in the Paint & Thinner Tin Can range under Industrial and Chemical Tin Cans, Pails, and Drums. The documented L852 model has a capacity of 500 ml, a finished height of 120 mm, 0.24 mm sheet metal and a ring-type paint lid. The same mold family also includes thinner containers and smaller paint packaging. When planning production, closure design and filling requirements are as important as container volume.

Body Dimensions of the 500 ml Metal Paint Container

The IA mold family has a reference diameter of 73 mm, a reference height of 37 mm and a capacity range of 0.15–1.1 liters. Available sheet thicknesses are 0.22 mm, 0.24 mm and 0.25 mm. The finished L852 paint container, however, is 120 mm high and uses 0.24 mm sheet metal. Its welded body has no additional shaping, body rib or carrying handle. When purchasing empty paint tins, consider more than nominal capacity. Finished container height, lid dimensions and filling equipment clearance should be checked before ordering. These measurements also influence carton arrangements and the position of products during transport.

Ring-Type Paint Lid and Pratik Closure for Thinner

L852 features a ring opening and a paint lid. No separate inner, outer or seam coating is specified for this model. The 300 ml L853 thinner container from the same family has a height of 80 mm, 0.24 mm sheet metal, a 32 mm opening and a Pratik 32 mm closure. The 250 ml L005 paint container also belongs to this family and has a height of 65 mm and a ring-type paint lid. The IA family offers additional options such as 42 mm openings, vented and textured Pratik closures, screw closures and metal plugs. These are not standard features of every finished model. When choosing metal paint tins with lids, confirm chemical compatibility between the contents, closure and inner surface.

Wholesale Empty Paint Cans and Printed Metal Packaging

For metal paint container manufacturers, adapting packaging to brand identity matters alongside reliable production. The IA mold family offers inner coating options such as pigment, silver, gold and clear lacquers, as well as enamel, lacquered and offset printed exterior finishes. These options should not be treated as standard coatings of L852. Kontensan has manufactured metal packaging since 1980. Its 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing facilities support custom printed paint packaging in suitable configurations. Prices for wholesale empty paint cans vary with capacity, closure type, sheet thickness, coating and order quantity. Share the technical characteristics of your filling product to define packaging requirements and request a quotation.

Frequently Asked Questions - FAQ

What are the height and sheet thickness of the 500 ml paint container?

The L852 model has a finished height of 120 mm and uses 0.24 mm sheet metal.

Which lid is used on the 500 ml paint container?

L852 features a ring-type paint lid and has no carrying handle.

Is thinner packaging available within the same mold family?

Yes. The 300 ml L853 thinner container uses a Pratik 32 mm closure with a 32 mm opening.
