1 Liter Tea-Coffee Tin Box MA

MA

Technical Specifications

Mold Code	MA
Diameter	105
Height	36
Volume	0.3 - 2.3 lt

Applicable Features

Kalınlık

0,24 mm · 0,25 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Yok · Emaye · Gold Laklı · Krem Laklı

Dış Kaplama

Silverlaklı · Gold Laklı · Emaye · Çift Laklı · Ofset Baskılı · Dekoratif Gold Laklı · Yok · Şeffaf Laklı

Kapak

Kristal Kapak · Kubbe Kapak · Geçme Kapak

Kulp / Menteşe

Tel Mekanizmalı

Kulp / Tapa Rengi

Yok

Dikiş / Kenet

Kenetli

Dikiş Kaplama

Yok

Forma / Kordon

Yok

Product Description

1 Liter Tea-Coffee Tin Box MA

1 Liter Tea-Coffee Tin Box MA is part of a metal packaging family for tea, coffee and suitable dry food products. Kontensan offers it in Tea, Coffee and Hot Flavors under Industrial and Chemical Tin Cans, Pails, and Drums. The MA mold family technical sheet covers capacities from 0.3 to 2.3 liters. The finished one-liter L549 model has a height of 150 mm and uses 0.24 mm sheet metal. Gold lacquer covers both its inner and outer surfaces. L549 has a dome lid and a mechanically joined body, with no handle or hinge. These details describe the finished model, not every available option in the wider family.

Dimensions of the One-Liter Tea-Coffee Metal Box

The general MA mold family specifications list a diameter of 105 mm, a height field of 36 mm and a capacity range of 0.3–2.3 liters. However, the finished height of the one-liter L549 model is 150 mm. Packaging selection, shipping cartons and shelf planning should therefore use L549's finished height rather than the general 36 mm figure. The family allows sheet thicknesses of 0.24 mm and 0.25 mm, while L549 uses 0.24 mm sheet metal. The same datasheet also lists a 1.25-liter K102 model with a height of 150 mm. Because their capacities differ, their filling requirements must not be treated as identical. A one-liter tea or coffee box does not necessarily hold one kilogram of product. Loose tea leaves, coffee beans and ground coffee have different bulk densities. Actual filling weight should be checked using the intended product.

Dome Lid and Gold-Lacquered Metal Packaging

Both the inner and outer surfaces of L549 have gold lacquer. It is specified with a dome lid and a mechanically joined body. No handle, hinge, seam coating or additional shaping or rib is listed. The K102 model in the same MA family is different: it holds 1.25 liters, is 150 mm high and has gold lacquer with a crystal lid and wire mechanism. The crystal lid and wire mechanism must not be described as standard features of L549. The wider MA family also lists slip-on lids, other lacquer finishes and offset printed exterior options. Before choosing a tea or coffee metal box, confirm that the inner coating is suitable for the intended food-contact use. A dome lid alone does not guarantee an airtight seal or protection against moisture and aroma loss.

Wholesale Tea-Coffee Boxes and Custom Printing

When sourcing metal tea and coffee boxes in bulk, assess capacity, lid design, sheet thickness, inner lacquer and brand appearance together. Kontensan has manufactured metal packaging since 1980. Its facilities in Konya and Istanbul provide a combined 25,000 square meters of indoor production space and metal offset printing equipment. The company exports to more than 30 countries. Requests for custom printed tea and coffee packaging may be assessed according to the selected model and surface configuration. However, an offset printing option in the family does not mean that L549 is printed by default. Before placing an order, confirm the target filling weight, required closure, artwork, quantity and food-contact conditions.

Frequently Asked Questions - FAQ

What is the height of the one-liter tea-coffee box?

The finished L549 model is 150 mm high and uses 0.24 mm sheet metal.

Which lid does the one-liter box have?

L549 has a dome lid and a mechanically joined body, with gold lacquer on both surfaces.

Is the crystal-lid option the same product?

No. K102 is a separate 1.25-liter model with a crystal lid and wire mechanism.
