Product Description

0.75 Liter Cookies and Baklava Tin Box

The 0.75 liter cookies and baklava tin box KA is a compact metal food package designed to protect, transport, and present cookies, baklava, syrup-based desserts, and similar food products. For the KA mold, the technical sheet states a diameter of 83 mm and a mold height of 37 mm. The same mold supports an applicable volume range of 0.2–1.5 liters. A slip lid provides simple opening and closing, while the lock-seamed body supports a clean structure suitable for serial production. Manufactured by Kontensan, this model is suitable for food brands looking for a cookies tin, baklava tin, or compact branded metal package with a narrow diameter and practical presentation.

Key Features of the Cookies and Baklava Tin Box

Lock-Seamed Compact Metal Packaging

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes subcategory. Available metal thickness options are 0.22 mm, 0.24 mm, and 0.25 mm. The body construction is lock-seamed and no seam coating is applied. The product has no hole, handle, hinge, or bead. This simple structure supports standardized production and a clean package appearance for wholesale cookie tin and wholesale baklava tin projects.

Practical Slip Lid

The KA mold uses a slip lid. This lid gives easy access to cookies, baklava, and similar products while keeping a traditional metal tin appearance. The 0.75 L sample product in the technical sheet also uses a slip lid. The absence of a handle and hinge keeps the profile simple, making the package practical for boutique food products, gift cookie tins, smaller dessert packaging, and corporate gift projects.

Offset Printing and Coating Options

The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow logos, product visuals, and corporate colors to be applied to the metal surface.

Applications and Brand Value

The 0.75 liter cookies and baklava tin box can be used for cookies, baklava, syrup-based desserts, premium food products, regional specialties, and corporate gift sets. Its 83 mm diameter creates a narrow and taller package form. Because the metal surface supports offset printing, the box can work as both protective packaging and a strong brand communication surface. Kontensan combines different lacquer and printing options with serial production capability, giving food brands a flexible solution for smaller-volume packaging.

Frequently Asked Questions - FAQ

What are the dimensions of the 0.75 liter cookies and baklava tin box?

The KA mold is listed with a diameter of 83 mm and a mold height of 37 mm. The 0.75 L sample product is listed with a height of 135 mm.

What is the applicable volume range of the KA mold?

The technical sheet states an applicable volume range of 0.2–1.5 liters for the KA mold.

Is this model lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.

Can custom printing be applied to the box?

Yes. Offset printing and different lacquer options can be applied to the outer surface, allowing the package to be customized for the brand and product series.
