Product Description

0.75 Liter Paint & Thinner Tin Can With Lid LH
0.75 Liter Paint & Thinner Tin Can With Lid LH is a bottom-necked metal packaging option for manufacturers seeking small-volume

paint containers. Kontensan offers this range within Paint & Thinner Tin Can, under Industrial and Chemical Tin Cans, Pails, and Drums. The LH mold family covers capacities from 0.5 to 1.3 liters and offers several closure configurations. The documented finished product example is the K085 paint container, which holds 800 ml rather than 750 ml. Therefore, its finished dimensions should not be presented as confirmed dimensions for the 0.75-liter product.

Dimensions and Sheet Metal Choices for Bottom-Necked Paint Tins

The LH mold family has a reference diameter of 95 mm and a reference height of 68 mm. Available sheet metal thicknesses are 0.22 mm, 0.24 mm and 0.25 mm. The welded body design is handle-free, and no additional body rib is specified. The finished K085 model has a height of 118 mm, a capacity of 800 ml and a sheet thickness of 0.24 mm. It is recorded as a bottom-necked paint container. When purchasing empty paint tins, distinguish mold reference dimensions from finished container dimensions. Compatibility with filling lines, closing equipment dimensions, carton arrangements and manual handling requirements should be confirmed before placing an order.

Ring-Type Paint Lids and Alternative Closures

The K085 model has a ring opening and a paint lid. It has no inner or outer lacquer coating, and no separate seam coating is specified. The LH family includes 32 mm and 42 mm openings, Pratik 32 and 42 mm closures, vented and textured closures, a Pratik 43 mm screw closure and a 42 mm metal plug. These alternatives are not all standard features of K085. When choosing metal paint tins with lids, the closure system must suit the paint formulation. Chemical compatibility with different types of thinner and any approvals required for dangerous goods transport must be checked separately.

Wholesale Empty Paint Cans and Custom Printing

When working with metal paint container manufacturers, inner lacquer, exterior finish and branding requirements are as important as capacity. The LH family offers inner coating options such as silver, pigment, gold and clear lacquer, along with exterior alternatives including enamel, decorative lacquer and offset printing. Kontensan has manufactured metal packaging since 1980. Its 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing facilities support custom printed paint packaging in suitable configurations. Prices for wholesale empty paint cans can vary with sheet thickness, closure type, coating, printing and order volume. Specify the target capacity, filling substance and packaging requirements clearly when requesting a production quotation.

Frequently Asked Questions - FAQ

Which sheet thicknesses are available for the 0.75-liter bottom-necked paint tin?

The LH family lists 0.22 mm, 0.24 mm and 0.25 mm options. The final thickness must be confirmed for the ordered product.

Which lid is used on this paint container?

The documented 800 ml K085 example has a ring-type paint lid. Other closure choices are available in the family.

Does the 800 ml model's height apply to the 0.75-liter version?

No. The finished height of K085 is 118 mm. The exact height of the 0.75-liter version must be confirmed.
