10 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans CA

CA

Technical Specifications

Mold Code	CA
Diameter	198
Length	198
Height	170 - 326
Volume	6 - 12 lt

Applicable Features

Kalınlık

0,28 mm · 0,30 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø32 mm · Ø42 mm · Ø56 mm

Kapak

Pratik 32 mm · Pratik 42 mm · Pratik 42 mm, Ventilli · Pratik 42 mm, Pütür · Pratik 43 mm Vidalı · Pratik 56 mm · Pratik 56 mm Sıkma · Pratik 56 mm Ventilli · Düz 40 mm Kulaklı · Ø42 Metal Tapa · Ø56 Metal Tapa · Pratik 32 mm, Ventilli · Sibop

Kulp

Plastic

Kulp/Tapa Rengi

Mavi · Yeşil · Beyaz · Kırmızı · Siyah · Turuncu · Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Yok

Dikiş/Kenet

Dikişli

Product Description

10 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans CA

10 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans CA is a metal packaging family developed for agricultural chemicals and liquid fertilizers. Kontensan offers this product within Agrochemical, Liquid Fertilizer & Seed Tin Cans under Industrial and Chemical Tin Cans, Pails, and Drums. The CA mold family covers capacities from 6 to 12 liters. The documented 10-liter K089 model has a finished height of 260 mm and uses 0.28 mm sheet metal. It features a 42 mm opening, a Pratik 42 mm closure and a plastic handle. These are the features of the specified model, not standard specifications for every container in the family.

Dimensions and Sheet Thickness of the 10-Liter Agricultural Container

The CA mold family has a stated diameter and length of 198 mm. Its height range is 170–326 mm, and available sheet metal thicknesses are 0.28 mm and 0.30 mm. The K089 model holds 10 liters and has a finished height of 260 mm. Its welded body has no additional shaping or reinforcing ribs. When buying agricultural metal packaging, do not confuse the family's full size range with the dimensions of a finished container. Filling lines, closing equipment and shipping cartons should be checked against the 260 mm model height. The density of the filling product also determines the total weight during transport.

Gold Lacquer, Pratik Closure and Handle Design

The K089 model has gold lacquer on its inner and outer surfaces. Its seam has powder lacquer inside and lacquer outside. The Pratik 42 mm closure fits a 42 mm opening, has a green closure color and is supplied with a plastic handle on the container. The CA mold family also offers 32 mm and 56 mm openings, vented or textured Pratik closures, screw closures, metal plugs and other lacquer finishes. These family-level alternatives are not all standard features of K089. When selecting an agrochemical container or liquid fertilizer package, compatibility between the product formulation, coating and closure materials must be technically confirmed. Leak protection and transport requirements should also be checked separately.

Wholesale Agrochemical Metal Packaging and Custom Printing

In industrial agricultural packaging, capacity is not the only concern. Reliable production, surface performance and brand presentation also matter. Kontensan has manufactured metal packaging since 1980. Its facilities in Konya and Istanbul provide 25,000 square meters of indoor production space, and its metal offset printing equipment supports custom printed agricultural packaging projects in suitable configurations. The company exports to more than 30 countries. Wholesale metal packaging prices may vary according to sheet thickness, closure and handle choices, inner and outer coatings, printing requirements and order quantity. When requesting a quotation, share the chemical characteristics of the product, target capacity and technical requirements.

Frequently Asked Questions - FAQ

What is the height of the 10-liter agricultural container?

The finished K089 model is 260 mm high and uses 0.28 mm sheet metal.

Which closure and handle are used on this container?

K089 has a 42 mm opening, a green Pratik 42 mm closure and a plastic handle.

What coatings are used on the 10-liter agricultural container?

K089 has gold lacquer on both surfaces. Its seam has powder lacquer inside and lacquer outside.
