18 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans AA

AA

Technical Specifications

Mold Code	AA
Diameter	232
Length	232
Height	170 - 395
Volume	8 - 21 lt

Applicable Features

Kalınlık

0,28 mm · 0,30 mm · 0,32 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø32 mm · Ø39 mm · Ø42 mm · Ø56 mm

Kapak

Pratik 32 mm · Pratik 42 mm · Pratik 42 mm, Ventilli · Pratik 42 mm, Pütür · Pratik 43 mm Vidalı · Pratik 56 mm · Pratik 56 mm Sıkma · Pratik 56 mm Ventilli · Düz 40 mm Kulaklı · Ø39 Metal Tapa · Ø42 Metal Tapa · Ø56 Metal Tapa · Pratik 32 mm, Ventilli · Düz 41 mm

Kulp

Plastic

Kulp/Tapa Rengi

Mavi · Yeşil · Beyaz · Kırmızı · Siyah · Turuncu · Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Yağ Forma+Köşe · Peynir Forma+Köşe

Dikiş/Kenet

Dikişli

Product Description

18 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans AA

18 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans AA is a metal packaging family for manufacturers seeking larger containers for agrochemicals and liquid fertilizers. Kontensan offers this product within Agrochemical, Liquid Fertilizer & Seed Tin Cans under Industrial and Chemical Tin Cans, Pails, and Drums. The AA mold family covers capacities from 8 to 21 liters. The documented 18-liter K092 model has a finished height of 350 mm and uses 0.30 mm sheet metal. It has a 42 mm opening, a Pratik 42 mm closure and a plastic handle. These specifications describe K092 rather than every model in the family.

Dimensions and Sheet Thickness of the 18-Liter Agricultural Container

The AA mold family has a stated diameter and length of 232 mm. Its height range is 170–395 mm, and available sheet metal thicknesses are 0.28 mm, 0.30 mm and 0.32 mm. The K092 model holds 18 liters and has a finished height of 350 mm. Its welded body is specified with a cheese-style formed shape and corners. Treating the mold family's full size range as the dimensions of one finished product can cause problems in filling and carton planning. Before ordering agricultural metal containers, check target capacity, finished height, the density of the filling product and pallet arrangements together.

Pratik Closure, Gold Lacquer and Alternative Models

K092 has gold lacquer on its inner and outer surfaces. Its seam has powder lacquer inside and lacquer outside. A plastic handle and yellow closure or plug color are specified. Within the same AA family, the 14-liter L838 model is 265 mm high, uses 0.28 mm sheet metal and has a 39 mm metal plug and plastic handle. K091 is named as a 10-liter product, but the datasheet records a 12-liter capacity. It is 245 mm high, uses 0.28 mm sheet metal and has a 32 mm opening with a Pratik 32 mm closure. This difference must be confirmed before ordering. Other family-level options include 56 mm openings, vented closures and additional surface finishes, but they are not all standard features of K092.

Wholesale Agrochemical and Liquid Fertilizer Metal Packaging

For agrochemical packaging, capacity alone is not enough. Compatibility between the filling product and inner coating, along with closure requirements, must also be checked. Chemical resistance and transport suitability for a specific pesticide or liquid fertilizer should not be promised without testing. Kontensan has manufactured metal packaging since 1980. Its facilities in Konya and Istanbul provide 25,000 square meters of indoor production space, and metal offset printing equipment supports custom printed agricultural containers in suitable configurations. The company exports to more than 30 countries. Wholesale metal packaging prices may vary with sheet thickness, closures, handles, coatings, printing and order quantity. State the product formulation and required technical specifications when requesting a quotation.

Frequently Asked Questions - FAQ

What is the height of the 18-liter agricultural container?

The K092 model has a finished height of 350 mm and uses 0.30 mm sheet metal.

Which closure is used on the 18-liter metal agricultural container?

K092 has a 42 mm opening, a Pratik 42 mm closure and a plastic handle.

Are other capacities available in the same mold family?

Yes. The AA family covers 8–21 liters. L838 holds 14 liters; K091 is named as 10 liters but its datasheet capacity field states 12 liters.
