19 Liter Agrochemical, Liquid Fertilizer & Seed Tin Bucket XA

XA

Technical Specifications

Mold Code	XA
Diameter	277
Height	150
Volume	8 - 28 lt

Applicable Features

Kalınlık

0,30 mm · 0,32 mm · 0,38 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø42 mm · Ø56 mm

Kapak

Pratik 42 mm · Pratik 42 mm, Ventilli · Pratik 42 mm, Pütür · Pratik 43 mm Vidalı · Pratik 56 mm · Pratik 56 mm Sıkma · Pratik 56 mm Ventilli · Ø42 Metal Tapa · Ø56 Metal Tapa · Sibop

Kulp

Plastic

Kulp/Tapa Rengi

Mavi · Yeşil · Beyaz · Kırmızı · Siyah · Turuncu · Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Kova Tek Kordon · Kova Çift Kordon

Dikiş/Kenet

Dikişli

Product Description

19 Liter Agrochemical, Liquid Fertilizer & Seed Tin Bucket XA

19 Liter Agrochemical, Liquid Fertilizer & Seed Tin Bucket XA is a metal drum family for medium and large packaging needs involving agrochemicals, liquid fertilizers and suitable agricultural products. Kontensan offers this range within Agrochemical, Liquid Fertilizer & Seed Tin Cans under Industrial and Chemical Tin Cans, Pails, and Drums. The XA family covers capacities from 8 to 28 liters. However, the finished product detailed in the technical datasheet is the 23-liter L640 model, not a documented 19-liter version. L640 has a finished height of 390 mm and uses 0.32 mm sheet metal. It features a 56 mm opening, a Pratik 56 mm closure, a plastic handle and a double-rib body.

Diameter and Capacity Range of Agricultural Metal Drums

The XA mold family has a diameter of 277 mm. Its datasheet lists a family height value of 150 mm, a capacity range of 8–28 liters and available sheet thicknesses of 0.30 mm, 0.32 mm and 0.38 mm. The finished L640 model, however, is 390 mm high. Therefore, 150 mm must not be used as its finished height. L640 holds 23 liters and has a seamed body with two reinforcing ribs. When ordering agricultural metal drums, distinguish the 19-liter product family label from L640's actual 23-liter capacity. Filling equipment, shipping cartons and pallet arrangements must be planned using the selected model's confirmed dimensions. Filled weight also depends on the density of the liquid.

Pratik 56 mm Closure and Lacquered Metal Surfaces

L640 has beige lacquer on its inner surface and gold lacquer on its exterior. Its seam uses powder lacquer inside and lacquer outside. A Pratik 56 mm closure fits its 56 mm opening. A plastic handle and red closure or plug color are specified. The XA family also offers 42 mm openings, vented and textured closures, screw closures, metal plugs, other lacquer finishes and single-rib bodies. These alternatives are not all standard features of L640. When selecting a metal drum for agrochemicals or liquid fertilizers, chemical compatibility between the filling formulation, inner coating and closure materials must be verified. Leak performance and dangerous goods transport compliance should never be assumed without the relevant tests and documentation.

Wholesale Agricultural Drums and Custom Printed Packaging

When sourcing agricultural metal packaging in bulk, capacity, body strength, closures and printing must be considered together. Kontensan has manufactured metal packaging since 1980. Its facilities in Konya and Istanbul provide a combined 25,000 square meters of indoor production space. Metal offset printing equipment supports custom printed agricultural drum requests in suitable configurations. The company exports to more than 30 countries. Wholesale agrochemical packaging prices may vary according to sheet thickness, closure type, handles, lacquers, rib design, printing and order quantity. When requesting a quotation, provide the product formulation, target capacity, shipping conditions and artwork requirements.

Frequently Asked Questions - FAQ

What capacities are available for agricultural metal drums?

The XA family datasheet covers 8–28 liters. Finished dimensions depend on the selected model.

What are the height and sheet thickness of the 23-liter drum?

The finished L640 model is 390 mm high and uses 0.32 mm sheet metal.

Which closure and handle are used on this metal drum?

L640 has a Pratik 56 mm closure, a plastic handle and a double-rib seamed body.
