19 Liter Agrochemical, Liquid Fertilizer & Seed Tin Pail YB

YB

Technical Specifications

Mold Code	YB
Diameter	270
Height	150
Volume	8 - 26 lt

Applicable Features

Kalınlık

0,30 mm · 0,32 mm · 0,38 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Yok

Kapak

Kova Kapağı (Formalı) · Kova Kapağı (Formasız)

Kulp

Kova Kulpu

Kulp/Tapa Rengi

Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Kova Tek Kordon · Kova Çift Kordon

Dikiş/Kenet

Dikişli

Product Description

19 Liter Agrochemical, Liquid Fertilizer & Seed Tin Pail YB

19 Liter Agrochemical, Liquid Fertilizer & Seed Tin Pail YB is a metal pail family for larger packaging needs involving agrochemicals, liquid fertilizers and suitable agricultural products. Kontensan offers this range within Agrochemical, Liquid Fertilizer & Seed Tin Cans under Industrial and Chemical Tin Cans, Pails, and Drums. The YB mold family covers capacities from 8 to 26 liters. However, the finished model described in the datasheet is the 26-liter L747, not a documented 19-liter configuration. L747 has a finished height of 450 mm and uses 0.32 mm sheet metal. The model features a formed pail lid, a pail handle and a single reinforcing rib.

Diameter and Capacity Range of Agricultural Metal Pails

The YB family has a mold diameter of 270 mm. Its family datasheet lists a height value of 150 mm and a capacity range of 8–26 liters. Available sheet thicknesses are 0.30 mm, 0.32 mm and 0.38 mm. The finished L747 model holds 26 liters and has a height of 450 mm. Therefore, the 150 mm family value must not be used as the finished height of L747. Its body is seamed and has one reinforcing rib. For wholesale agricultural pail orders, check the actual finished height, filled weight, closure method and pallet layout as well as capacity. With liquid products, total weight depends on the density of the contents, not only on volume in liters.

Formed Pail Lid, Handle and Gold Lacquer Finish

L747 has gold lacquer on its inner and outer surfaces. Its seam has powder lacquer inside and lacquer outside. The pail has no separate filling opening; it uses a formed pail lid and a pail handle. The YB family also lists unformed pail lids, double-rib bodies, other lacquer options and offset printed exterior finishes. These are not all standard specifications of L747. When choosing a metal pail for agrochemicals or liquid fertilizers, compatibility between the product formulation, surface coating and lid must be assessed. Leak performance, dangerous goods transport requirements and durability approvals should not be assumed without supporting technical tests.

Wholesale Agricultural Pails and Custom Printed Packaging

For larger agricultural metal packaging, body construction, safe filling and branded printing must be considered together. Kontensan has manufactured metal packaging since 1980. Its facilities in Konya and Istanbul provide a combined 25,000 square meters of indoor production space. Metal offset printing equipment supports requests for custom printed agricultural pails in suitable technical configurations. The company exports to more than 30 countries. Wholesale metal pail prices may vary with sheet thickness, lid selection, surface coating, rib design, printing and order quantity. When requesting a quotation, specify the chemical characteristics of the product, target capacity, leak performance requirements and artwork.

Frequently Asked Questions - FAQ

What capacities are available for agricultural metal pails?

The YB mold family covers 8–26 liters. Exact finished dimensions depend on the chosen model.

What are the height and sheet thickness of the 26-liter pail?

The finished L747 model is 450 mm high and uses 0.32 mm sheet metal.

Which lid and handle are used on the 26-liter agricultural pail?

L747 uses a formed pail lid, a pail handle and a single-rib body.
