Product Description

0.75 L Welded Side-Seam Tea and Coffee Tin

The 0.75 L Welded Side-Seam Tea and Coffee Tin is a compact metal coffee tin with a welded side-seam body and an easy-open aluminum lid. With a Ø83 mm diameter and 37 mm height, it suits fill volumes ranging from 0.2 to 1.5 liters. This product belongs

to the Tea, Coffee, and Hot Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

Welded Side-Seam Body and Easy-Open Lid

The welded side-seam tea tin offers a strong body with its welded seam. The easy-open aluminum lid provides a ring-pull, can-type closure so the content can be sealed airtight. This structure suits retail presentations such as 250–500 gram coffee packs; slip-on and open-mouth options are also available.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the easy-open aluminum lid minimizes air contact. In this way, a metal coffee tin preserves the aroma of coffee for a long time.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. Metal offset printing applies a custom brand design to the outer surface.

Durability and Food Safety

The welded side-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Production in alternative moulds, such as a 750 ml easy-open version, is also possible.

Frequently Asked Questions - FAQ

What products is a 0.75 liter tin suitable for?

With its compact volume, it suits 250–500 gram coffee packs, tea and similar dry foods. The easy-open lid is ideal for can-type retail presentations.

What do a welded seam and an easy-open lid provide together?

The welded seam gives a strong body and the easy-open aluminum lid gives an airtight closure. Together they form a can-type coffee tin.

Can this tin be sealed airtight?

Yes. When produced with the easy-open aluminum lid, the content can be sealed airtight; this protects the freshness of coffee.

Can custom brand printing be applied?

Yes. With metal offset printing and various lacquer options, custom, printed welded side-seam tea and coffee tins can be produced.
