Product Description

0.8 Liter Tea-Coffee Tin Box AO

0.8 Liter Tea-Coffee Tin Box AO is a metal packaging option for tea and coffee brands that need an 800 ml container. Kontensan offers it within Tea, Coffee and Hot Flavors under Industrial and Chemical Tin Cans, Pails, and Drums. The AO mold family technical sheet lists a capacity of 0.8 liters. The finished L442 model is 78 mm high and uses 0.24 mm sheet metal. Its inner and outer surfaces have gold lacquer, with a slip-on lid and a mechanically joined body. It has no handle, hinge, seam coating or additional reinforcing rib. These specifications describe the documented 800 ml finished model.

Dimensions of the 800 ml Tea-Coffee Metal Box

The AO mold family lists a diameter of 149 mm, a length of 74 mm and a height of 78 mm. The finished L442 model also has a height of 78 mm. The family allows sheet metal thicknesses of 0.24 mm and 0.25 mm, while L442 itself uses 0.24 mm sheet metal. Its capacity is 800 ml. When selecting a tea or coffee container, this volume does not mean it will hold 800 grams of tea or coffee. Loose tea, coffee beans and ground coffee have different bulk densities. The target net weight must be confirmed through filling tests with the actual product. Shipping cartons, label placement and shelf layouts should also be designed around the model's finished dimensions.

Slip-On Lid and Gold-Lacquered Metal Packaging

L442 is a mechanically joined metal box with gold lacquer on its inner and outer surfaces and a slip-on lid. The model has no handle or hinge. No seam coating or decorative rib is specified. The general AO family options include silver, pigment, clear and decorative gold lacquer, enamel and offset printed exteriors. However, these are not all standard features of L442. When buying a tea or coffee metal box, verify that its inner coating is suitable for the intended food-contact application. A slip-on lid alone does not guarantee an airtight seal or protection against moisture and aroma loss. The required barrier performance should be tested under actual filling conditions.

Wholesale Tea-Coffee Boxes and Custom Offset Printing

When tea and coffee producers buy metal packaging in bulk, finished capacity, surface treatment, lid function and branded printing should be considered together. Kontensan has manufactured metal packaging since 1980. Its facilities in Konya and Istanbul provide 25,000 square meters of indoor production space and metal offset printing equipment. The company exports to more than 30 countries. Custom printed tea and coffee packaging requests may be evaluated for suitable configurations. Pricing can vary with sheet thickness, printing scope, surface finishes and order quantity. For a technical quotation, provide the product type, target net weight, packaging artwork and lid requirements.

Frequently Asked Questions - FAQ

What is the finished height of the 800 ml tea-coffee box?

L442 is 78 mm high and uses 0.24 mm sheet metal.

Which lid and surface finish does this metal box use?

L442 has a slip-on lid, a mechanically joined body and gold lacquer on both surfaces.

Can the 800 ml tea-coffee box have custom printing?

The AO family includes offset printed exterior options. Printing and food-contact suitability must be confirmed for L442.
