Product Description

2 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can NA

2 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can NA is a two-liter metal packaging solution developed for agricultural products. Offered by Kontensan, it belongs to the Industrial and Chemical Tin Cans, Pails, and Drums main category and the Agrochemical, Liquid Fertilizer & Seed Tin Cans subcategory. Different closure and coating options allow the package to be configured according to product formulation and filling requirements.

Body and closure design of the two-liter agricultural container

The mold family has a diameter of 140 mm and supports production in volumes from 0.5 to 3.8 liters. The seamed metal body is available with thickness options of 0.24 and 0.25 mm. The design has no handle or reinforcing bead and can feature a 90 mm opening or a ring opening. Closure options include a 90 mm metal plug, a lacquered metal plug and a paint-style lid. Final closure selection should consider filling equipment and usage requirements.

Internal coatings for agrochemical and liquid fertilizer packaging

The internal surface of metal packaging must suit the chemical properties of the intended contents. Options include Gold, Silver, clear, pigment and double lacquer coatings. Powder lacquer and other seam coating applications can also be considered. Chemical compatibility, leak resistance and transport conditions must be confirmed before filling with agrochemicals or liquid fertilizers. For seed packaging, moisture and storage conditions must also be considered.

Custom metal packaging manufacturing for agriculture

Exterior options include enamel, lacquer and metal offset printing. Custom printing helps display product information and required usage warnings clearly on the packaging. Kontensan combines its metal packaging experience since 1980 with manufacturing facilities in Konya and Istanbul. Body, closure, coating and printing specifications are confirmed together before ordering.

Frequently Asked Questions - FAQ

Which closures are available for the two-liter agricultural container?

Options include a 90 mm metal plug, a lacquered metal plug and a paint-style lid. The suitable closure is selected according to filling and usage conditions.

Is the container suitable for liquid fertilizers and agrochemicals?

It can be considered for these applications. Final suitability depends on confirming compatibility between the formulation, metal, lacquer and closure.

Can the agricultural container be custom printed?

Yes. Metal offset printing is available. Print design and exterior coating are confirmed before ordering.
