Product Description

3 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can OA

3 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can OA is a three-liter metal packaging solution designed for agricultural products. Offered by Kontensan, it belongs to the Industrial and Chemical Tin Cans, Pails, and Drums main category and the Agrochemical, Liquid Fertilizer & Seed Tin Cans subcategory. Its ring closure design and different surface coating options allow the package to be configured according to filling and usage requirements.

Technical features of the three-liter agricultural container

The mold family has a diameter of 153 mm and supports production in volumes from 0.7 to 5 liters. Metal thickness options include 0.24 and 0.25 mm. A seamed body, ring opening and paint-style lid are the main design features. This design has no handle or reinforcing bead. Final height and metal thickness should be confirmed according to the selected production configuration.

Coating selection for agrochemical and liquid fertilizer packaging

Internal coatings for agricultural metal packaging should be selected according to the product formulation. Options such as Gold, clear, pigment, cream enamel and double lacquer allow different packaging requirements to be evaluated. Internal and external seam coatings are also available. Chemical compatibility, leak resistance and transport requirements must be confirmed before filling. For seed packaging, moisture and storage conditions should also be considered.

Custom printing for agricultural metal packaging

Exterior options include offset printing, enamel and different lacquers. Custom designs help display product information, usage instructions and required warnings clearly on the packaging. Kontensan combines its metal packaging experience since 1980 with production and printing facilities in Konya and Istanbul. Closure, coating and printing choices are evaluated together before ordering.

Frequently Asked Questions - FAQ

What products can the three-liter agricultural container hold?

It can be considered for agrochemical, liquid fertilizer and seed packaging. Final suitability depends on the product properties and selected packaging configuration.

Can the internal surface be coated?

Yes. Several internal lacquer options are available. The coating should be selected based on compatibility with the intended contents.

Can this metal package be custom printed?

Yes. Offset printing is available. The print design and surface coating are confirmed before production.
