3 Liter Tea-Coffee Tin Box JB

JB

Technical Specifications

Mold Code	JB
Diameter	120
Height	36
Volume	0.5 - 3 lt

Applicable Features

Kalınlık

0,24 mm · 0,25 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Yok · Emaye · Gold Laklı · Krem Laklı

Dış Kaplama

Silverlaklı · Gold Laklı · Emaye · Çift Laklı · Ofset Baskılı · Dekoratif Gold Laklı · Yok · Şeffaf Laklı

Kapak

Geçme Kapak

Kulp / Menteşe

Yok

Kulp / Tapa Rengi

Yok

Product Description

3 Liter Tea-Coffee Tin Box JB

3 Liter Tea-Coffee Tin Box JB is a metal packaging family designed for presenting tea and coffee products in larger containers. Kontensan offers it within Tea, Coffee and Hot Flavors under Industrial and Chemical Tin Cans, Pails, and Drums. The JB mold family datasheet lists a capacity range of 0.5–3 liters and a diameter of 120 mm. The finished three-liter L389 model is recorded as 270 mm high and made with 0.24 mm sheet metal. Its inner and outer surfaces have gold lacquer. It uses a slip-on lid and a mechanically joined body. These specifications describe one finished model rather than every possible option in the wider mold family.

Dimensions of the Three-Liter Tea-Coffee Metal Box

The general JB mold family information lists a diameter of 120 mm, a height field of 36 mm and a capacity range of 0.5–3 liters. However, the finished three-liter L389 product is recorded as 270 mm high. For packaging selection and carton planning, the finished model's 270 mm height should be used instead of the general 36 mm family value. The JB family allows metal thicknesses of 0.24 mm and 0.25 mm, while L389 itself uses 0.24 mm sheet metal. A three-liter tea or coffee container does not automatically hold three kilograms of product. Loose tea leaves, coffee beans and ground coffee have different bulk densities. The target net weight should be defined through filling tests with the actual product. This check is important for both filling line setup and shipping plans.

Gold-Lacquered Body and Slip-On Lid

The L389 model has gold lacquer on both inner and outer surfaces. Its datasheet lists a slip-on lid, a mechanically joined body and no handle. No hinge, seam coating, additional shaping or rib is specified. The wider JB mold family also includes possible surface options such as silver, pigment, clear, enamel and decorative gold lacquer, as well as offset printed exteriors. However, these alternatives must not all be described as standard features of L389. When selecting a tea or coffee metal box, the inner coating's suitability for contact with the intended food should be confirmed separately. A slip-on lid does not automatically make the box airtight or guarantee aroma protection. Tests should be requested when moisture resistance or aroma retention is required.

Wholesale Tea-Coffee Boxes and Offset Printing

When buying tea and coffee metal packaging in bulk, finished dimensions, sheet thickness, surface lacquer and closure design matter alongside price. Kontensan has manufactured metal packaging since 1980. Its factories in Konya and Istanbul provide a combined 25,000 square meters of indoor production space, including metal offset printing equipment. The company exports to more than 30 countries. For orders requiring custom branding, the JB family's offset printed exterior option can be considered. However, the exact printing and coating configuration for L389 must be approved before ordering. A quotation request should clearly state the product type, target net filling weight, order quantity, brand artwork and required food-contact conditions.

Frequently Asked Questions - FAQ

What is the height of the three-liter tea-coffee metal box?

The finished L389 model is 270 mm high. The general JB family height value of 36 mm is not the finished model dimension.

Which lid and lacquer does L389 use?

L389 has gold lacquer on its inner and outer surfaces, a slip-on lid and a mechanically joined body.

Can the three-liter tea-coffee box have custom printing?

The JB family lists offset printed exterior options. Printing, lacquer and food-contact requirements must be confirmed for L389.
