Product Description

1.2 Liter Cookies and Baklava Tin Box

The 1.2 liter cookies and baklava tin box FA is a metal food packaging solution designed to protect, transport, and present cookies, baklava, and syrup-based desserts. The FA mold has a diameter of 103 mm, a length of 166 mm, and a height of 36 mm. The technical sheet states an applicable volume range of 0.6–3.3 liters for this mold. Crystal lid and slip lid options allow brands to choose between visible product presentation and a more classic metal tin appearance. Manufactured by Kontensan, this model is suitable for food producers looking for a cookies tin, baklava tin, or customizable metal box that can support both product protection and branded presentation.

Key Features of the Cookies and Baklava Tin Box

Metal Packaging Structure for Food Products

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes subcategory. The available 0.24 mm and 0.25 mm metal thickness options provide a balanced and durable body. Its lock-seamed construction creates a clean body connection. The box has no hole, handle, hinge, seam coating, or bead. This simple technical structure is suitable for standardized production in wholesale cookie tin and wholesale baklava tin orders.

Crystal Lid and Slip Lid Options

The FA mold can be produced with either a crystal lid or a slip lid. A crystal lid keeps the food visible and can improve presentation for gift, premium, or display products. A slip lid provides a more traditional metal tin appearance and works well for simple packaging concepts. These two options allow the same metal body to serve different product positioning strategies.

Offset Printing and Coating Options

The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, and decorative gold lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These choices make the box suitable for printed baklava tins, gift cookie tins, and packaging projects that need a strong visual identity.

Applications and Brand Value

The 1.2 liter cookies and baklava tin box can be used for cookies, baklava, syrup-based desserts, boutique food products, regional specialties, and corporate gift packaging. Because the metal surface supports offset printing, the box can work as both packaging and a brand communication surface. For export-oriented products, durable metal packaging can also provide a different shelf and transport position compared with standard paper-based boxes. Kontensan combines different lacquer, printing, and lid options with serial production capability, giving food brands a practical way to balance technical packaging needs with visual presentation.

Frequently Asked Questions - FAQ

What are the dimensions of the 1.2 liter cookies and baklava tin box?

The FA mold has a diameter of 103 mm, a length of 166 mm, and a height of 36 mm. The technical sheet states an applicable volume range of 0.6–3.3 liters.

Can custom printing be applied to the box?

Yes. Offset printing and different lacquer options can be applied to the outer surface, allowing the tin to be customized for a brand, product series, or campaign.

What is the difference between a crystal lid and a slip lid?

A crystal lid keeps the product visible through the top of the package. A slip lid gives the box a more classic metal tin appearance. The preferred option depends on product positioning and presentation.

Which products can be packed in this tin box?

It can be used for cookies, baklava, syrup-based desserts, boutique food products, regional specialties, and gift food packaging.
