5 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans HA

HA

Technical Specifications

Mold Code	HA
Diameter	116
Length	150
Height	100 - 316
Volume	1.5 - 5.5 lt

Applicable Features

Kalınlık

0,24 mm · 0,25 mm · 0,28 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø32 mm · Ø39 mm · Ø42 mm

Kapak

Pratik 32 mm · Pratik 42 mm · Pratik 42 mm, Ventilli · Pratik 42 mm, Pütür · Pratik 43 mm Vidalı · Düz 40 mm Kulaklı · Ø39 Metal Tapa · Ø42 Metal Tapa · Pratik 32 mm, Ventilli · Düz 41 mm

Kulp

Plastic

Kulp/Tapa Rengi

Mavi · Yeşil · Beyaz · Kırmızı · Siyah · Turuncu · Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Yok

Dikiş/Kenet

Dikişli

Product Description

5 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans HA

5 Liter Agrochemical, Liquid Fertilizer & Seed Tin Cans HA is a metal packaging family available in different volumes for agrochemicals, liquid fertilizers and other agricultural products. Kontensan offers it within Agrochemical, Liquid Fertilizer & Seed Tin Cans under Industrial and Chemical Tin Cans, Pails, and Drums. The HA mold family covers capacities from 1.5 to 5.5 liters. However, the finished product detailed in the technical datasheet is the 4-liter L655 model, not a 5-liter version. L655 has a finished height of 225 mm, 0.24 mm sheet metal, a 39 mm metal plug and a plastic handle.

Dimensions and Capacity of the Agricultural Metal Container

The HA family datasheet gives a diameter of 116 mm, a length of 150 mm and a height range of 100–316 mm. The available capacity range is 1.5–5.5 liters, with sheet thicknesses of 0.24 mm, 0.25 mm and 0.28 mm. The completed L655 version holds 4 liters and measures 225 mm in height. Its welded body has no additional shaping or ribbing. When sourcing agricultural metal containers, do not confuse the mold family's production range with the dimensions of a finished model. Filling equipment, carton arrangements and shipping plans must be based on the actual selected container.

Metal Plug, Gold Lacquer and Handle Features

The 4-liter L655 model has a gold-lacquered inner surface and a double-lacquered outer surface. Its seam uses powder lacquer inside and lacquer outside. A metal plug closes the 39 mm opening; the model also has a plastic handle and a yellow plug color. The HA family offers other options, including 32 mm and 42 mm openings, Pratik closures, vented closures, a screw-type closure and different surface coatings. These are not standard specifications of L655. When selecting an agrochemical container or liquid fertilizer package, chemical compatibility between the product formulation, metal surface, lacquer and closure system must be verified. Required leak and transport testing should also be considered separately.

Wholesale Agrochemical Packaging and Offset Printing

In agricultural packaging, closure design, safe filling and brand presentation matter alongside capacity. The HA family includes enamel, lacquered and offset printed exterior options; custom production details must be confirmed for the chosen version. Kontensan has manufactured metal packaging since 1980. Its facilities in Konya and Istanbul provide a combined 25,000 square meters of indoor production space. Metal offset printing equipment allows the company to evaluate custom printed agricultural packaging in suitable configurations. It exports to more than 30 countries. Wholesale metal container prices depend on capacity, sheet thickness, closures, handles, lacquer, printing and order volume. Share your product formulation and required capacity to request a technical quotation.

Frequently Asked Questions - FAQ

What capacity range does the 5-liter agricultural container family cover?

The HA family covers 1.5–5.5 liters. Exact finished dimensions and features depend on the model.

What is the height of the documented 4-liter model?

The L655 model is 225 mm high and uses 0.24 mm sheet metal.

Which closure and coating are used on the 4-liter container?

L655 has a 39 mm metal plug, a gold-lacquered interior, a double-lacquered exterior and a plastic handle.
