Product Description

6 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can PA

PA 6 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can PA is a six-liter metal package designed for agricultural products. Manufactured by Kontensan, it belongs to the Industrial and Chemical Tin Cans, Pails, and Drums category and the Agrochemical, Liquid Fertilizer & Seed Tin Cans product group. Packaging selection should consider the chemical properties of the intended contents and their conditions of use.

Technical design for agrochemical and liquid fertilizer packaging

The six-liter agricultural metal container, reference L773, measures 175 mm in diameter and 250 mm in height, with a metal thickness of 0.25 mm. Its standard configuration has no internal coating and an enamel-coated exterior. The seamed body features a 42 mm filling opening, a Pratik 42 mm closure and a red plastic handle. This design supports filling and handling processes.

Coating and closure options for agricultural metal packaging

Manufacturing options include metal thicknesses of 0.24, 0.25 and 0.28 mm, different internal and external coatings, offset printing and alternative closures. Vented and screw closures can be considered according to product requirements. Internal coating selection is particularly important for liquid fertilizer and agrochemical formulations. Chemical compatibility must be confirmed before filling.

Custom agricultural packaging for brands

Kontensan has manufactured metal packaging since 1980. Its production facilities in Konya and Istanbul and metal offset printing capabilities allow technical requirements and brand identity to be considered together. Printing, coating and closure choices are confirmed according to order requirements.

Frequently Asked Questions - FAQ

What products can the six-liter agricultural container hold?

It can be considered for agrochemical, liquid fertilizer and seed packaging. Metal, coating and closure compatibility must be checked for each product.

Does the container have an internal coating?

The standard L773 configuration has no internal coating. Alternative coatings can be considered according to product requirements.

Are custom printing and closure options available?

Yes. Offset printing, different closures and handle colors are available manufacturing options. The appropriate combination is confirmed before ordering.
