6 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can WA

WA

Technical Specifications

Mold Code	WA
Diameter	213
Height	140
Volume	5 - 11 lt

Applicable Features

Kalınlık

0,28 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Gold Laklı · Krem Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Çift Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Emaye · Ofset Baskılı · Yok

Delik

Ø42 mm · Ø56 mm

Kapak

Pratik 42 mm · Pratik 42 mm, Ventilli · Pratik 42 mm, Pütür · Pratik 43 mm Vidalı · Pratik 56 mm · Pratik 56 mm Sıkma · Pratik 56 mm Ventilli · Ø42 Metal Tapa · Ø56 Metal Tapa · Sibop

Kulp

Plastic

Kulp/Tapa Rengi

Mavi · Yeşil · Beyaz · Kırmızı · Siyah · Turuncu · Yok

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Yok

Dikiş/Kenet

Dikişli

Product Description

6 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can WA

6 Liter Agrochemical, Liquid Fertilizer & Seed Tin Can WA is a metal packaging family for agrochemicals, liquid fertilizers and suitable agricultural products. Kontensan offers it within Agrochemical, Liquid Fertilizer & Seed Tin Cans under Industrial and Chemical Tin Cans, Pails, and Drums. The WA mold family covers 5–11 liters. However, the finished product detailed in the technical datasheet is the 11-liter K107 model, not a documented 6-liter version. K107 has a finished height of 321 mm and uses 0.28 mm sheet metal. It includes a 42 mm opening, a Pratik 42 mm closure and a plastic handle.

Diameter and Capacity of Agricultural Metal Containers

The WA mold family has a diameter of 213 mm. The general section of the datasheet lists a height of 140 mm and a capacity range of 5–11 liters. The finished K107 model, however, measures 321 mm high. Therefore, 140 mm must not be treated as its finished height. The family's specified sheet thickness is 0.28 mm, which also applies to K107. Its seamed body has no additional shaping or reinforcing ribs. When ordering wholesale agricultural containers, check the chosen volume, actual finished dimensions, filling equipment and transport arrangements together.

Pratik 42 mm Closure, Handle and Lacquer Finish

K107 has beige lacquer on its inner surface and gold lacquer on the outside. Its seam uses powder lacquer inside and lacquer outside. A Pratik 42 mm closure fits the 42 mm opening. The model also has a plastic handle and a yellow closure or plug color. The WA family lists other options, including 56 mm openings, vented or screw closures, metal plugs and different coating finishes. These alternatives are not all standard features of K107. Before using an agricultural metal container for an agrochemical or liquid fertilizer, verify chemical compatibility between the formulation, lacquer and closure system. Leak performance and transport suitability may require technical testing.

Wholesale Agrochemical Packaging and Offset Printing

For agricultural metal packaging, capacity, body design and printing requirements should be considered together. Kontensan has manufactured metal packaging since 1980. Its facilities in Konya and Istanbul provide a combined 25,000 square meters of indoor production space. Metal offset printing equipment supports custom printed agricultural packaging in suitable configurations. The company exports to more than 30 countries. Wholesale metal container prices may vary according to sheet thickness, closures, handles, lacquer, printing and order quantity. When requesting a quotation, share the product's chemical properties, target volume and required closure details.

Frequently Asked Questions - FAQ

What capacities does this container family cover?

The WA mold family covers 5–11 liters. Finished dimensions depend on the chosen model.

What is the height of the documented 11-liter model?

K107 has a finished height of 321 mm and uses 0.28 mm sheet metal.

Which closure and coatings does K107 use?

K107 has a Pratik 42 mm closure and plastic handle, with beige inner lacquer and gold outer lacquer.
