Product Description

1.2 Liter Nuts Tin

The 1.2 liter nuts tin EY is a compact metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. The source gives the product name as 1.2 L, while the EY technical sheet title uses 1/2 L. The same technical sheet states a 105 mm diameter, 105 mm length, 140 mm height, and an applicable volume range of 1.5–1.75 liters. For that reason, the product name, the technical sheet title, and the applicable volume range should not be treated as the same value. A slip lid gives the nuts tin simple opening and closing, while the lock-seamed body supports clean serial production. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or branded metal package with a narrow base and taller form.

Key Features of the 1.2 Liter Nuts Tin

Narrow Base and Tall Nuts Tin Form

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. Its 105 × 105 mm base and 140 mm technical height give the nuts tin a narrow and tall form. This can reduce horizontal shelf use while improving vertical presentation. It creates a different visual profile for nuts, regional specialties, and gift food packaging.

Slip Lid and Lock-Seamed Nuts Tin Body

The EY nuts tin uses a slip lid. The body construction is lock-seamed, and the technical sheet states that no seam coating is applied. The product has no hole, handle, hinge, or bead. Available metal thickness options are 0.24 mm and 0.25 mm. This simple structure keeps the nuts tin practical for serial production and gives the package a clean appearance.

Offset Printing and Coating Options

The nuts tin inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow the nuts tin to carry logos, product visuals, and brand colors for pistachio exports, premium nut ranges, and wholesale packaging.

Applications and Brand Value

The 1.2 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. Its narrow and tall form creates a different shelf profile, while offset printing turns the nuts tin into a visible brand communication surface. Kontensan combines lacquer and printing options with serial production capability, making this nuts tin suitable for retail, export, corporate gift, and wholesale projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 1.2 liter nuts tin?

The EY technical sheet lists a 105 mm diameter, 105 mm length, and 140 mm height. The alternative 1.5 L sample product is listed with a height of 160 mm.

What volume range is available for this nuts tin?

The technical sheet states an applicable volume range of 1.5–1.75 liters for the EY mold.

Why is the product name different from the technical sheet?

The source gives the product name as 1.2 L, the technical sheet title as 1/2 L, and the applicable volume range as 1.5–1.75 L. These source values are kept separate in this content.

Is this nuts tin lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.
