Product Description

1.2 Liter Nuts Tin

The 1.2 liter nuts tin JD is a compact metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. The product name is given as 1.2 L, while the JD technical sheet title uses 1/2 L. The same technical sheet states a 120 mm diameter, 120 mm length, 34 mm mold height, and an applicable volume range of 0.5–2.3 liters. For that reason, the product name and the technical sheet title should be read separately. A slip lid gives the nuts tin simple opening and closing, while the lock-seamed body supports clean serial production. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or compact branded metal package.

Key Features of the 1.2 Liter Nuts Tin

Compact Size and Flexible Nuts Tin Volume

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. Its 120 × 120 mm base keeps the nuts tin compact, while the 0.5–2.3 L applicable volume range supports different product quantities within the same mold family. This makes the nuts tin useful for retail, gift, regional food, and wholesale packaging projects.

Slip Lid and Lock-Seamed Nuts Tin Body

The JD nuts tin uses a slip lid. The body construction is lock-seamed, and the technical sheet states that no seam coating is applied. The product has no hole, handle, hinge, or bead. Available metal thickness options are 0.24 mm and 0.25 mm. This simple structure keeps the nuts tin practical for serial production and gives the package a clean appearance.

Offset Printing and Coating Options

The nuts tin inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow the nuts tin to carry logos, product visuals, and brand colors for pistachio exports, premium nut ranges, and wholesale packaging.

Applications and Brand Value

The 1.2 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. Its compact base makes efficient use of shelf space, while offset printing turns the nuts tin into a visible brand communication surface. Kontensan combines lacquer and printing options with serial production capability, making this nuts tin suitable for retail, export, corporate gift, and wholesale projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 1.2 liter nuts tin?

The JD mold is listed with a 120 mm diameter, 120 mm length, and 34 mm mold height. The alternative 500 ml sample product is listed with a height of 36 mm.

What volume range is available for this nuts tin?

The technical sheet states an applicable volume range of 0.5–2.3 liters for the JD mold.

Why is the product name different from the technical sheet title?

The source gives the product name as 1.2 L, while the technical sheet title uses 1/2 L. Both source statements are kept separate in this content.

Is this nuts tin lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.
