Product Description

1.2 Liter Nuts Tin

The 1.2 liter nuts tin MA is a metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. The product name is given as 1.2 L, while the MA technical sheet describes the product as 1/2 L. The same sheet states a 105 mm diameter, 36 mm mold height, and an applicable volume range of 0.3–2.3 liters. For that reason, the product name and technical sheet description are kept separate. A slip lid gives the nuts tin simple opening and closing, while the lock-seamed body supports clean serial production. The decorative bead adds a stronger visual detail to the nuts tin. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or compact branded metal package.

Key Features of the 1.2 Liter Nuts Tin

Compact Size and Flexible Nuts Tin Capacity

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. Its 105 mm diameter and 36 mm mold height give the nuts tin a compact form. The 0.3–2.3 L applicable volume range allows the same mold family to support different filling quantities for small and medium packaging projects.

Slip Lid and Lock-Seamed Nuts Tin Body

The MA nuts tin uses a slip lid. The body construction is lock-seamed, and the technical sheet states that no seam coating is applied. The product has no hole, handle, or hinge. Available metal thickness options are 0.24 mm and 0.25 mm. This clean structure keeps the nuts tin practical for serial production.

Decorative Bead and Offset Printing

The decorative bead adds visual movement to the metal surface and helps the nuts tin stand apart from plain-body alternatives. The inner surface can use silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer.

Applications and Brand Value

The 1.2 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. Its compact body supports efficient shelf use, while the decorative bead gives the nuts tin a stronger visual identity. Offset printing turns the metal surface into a visible brand communication area. Kontensan combines coating and printing options with serial production capability, making this nuts tin suitable for retail, export, corporate gift, and wholesale projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 1.2 liter nuts tin?

The MA technical sheet lists a 105 mm diameter and 36 mm mold height. The alternative 500 ml sample product is listed with an actual height of 60 mm.

What volume range is available for this nuts tin?

The technical sheet states an applicable volume range of 0.3–2.3 liters for the MA mold.

Is this nuts tin lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.

Does this nuts tin have a decorative bead?

Yes. The technical sheet lists a decorative bead in the form / bead field.
