1/2 Liter Olive Oil Tin Can Z3

Z3

Technical Specifications

Mold Code	Z3
Diameter	49
Length	75
Height	60
Volume	0.2 - 0.8 lt

Applicable Features

Kalınlık

0,22 mm · 0,24 mm · 0,25 mm

İç Kaplama

Silverlaklı · Gold Laklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Krem Laklı · Dekoratif Gold Laklı · Gri Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Emaye · Çift Laklı · Ofset Baskılı · Şeffaf Laklı · Dekoratif Gold Laklı · Yok

Delik

Ø24 mm

Kapak

Pratik 24 mm

Kulp / Menteşe

Yok

Product Description

1/2 Liter Olive Oil Tin Can Z3

1/2 Liter Olive Oil Tin Can Z3 is a small metal packaging family used for 500 ml olive oil filling. Kontensan offers the product within Olive Oil Tin Cans under Food Tin & Metal Packaging. When choosing smaller olive oil containers, producers should check finished height, inner lacquer, closure and filling-line compatibility, not only capacity. Buyers ordering empty olive oil tins should compare the different finished versions separately, even when their nominal volumes match.

Technical Dimensions of the 500 ml Olive Oil Tin

The Z3 mold family has a diameter of 49 mm, a length of 75 mm, a reference height of 60 mm and a capacity range from 0.2 to 0.8 liters. The finished 500 ml versions have different heights: L087 measures 150 mm and L811 measures 160 mm. Both use 0.22 mm sheet metal, a seamed body, a 24 mm opening, a matching practical closure, a green cap and no handle. The mold's 60 mm reference is therefore not the finished container height. The 400 ml L723 version in the same family is 120 mm high and must not be confused with the half-liter versions.

Differences in Inner Lacquer for Olive Oil Packaging

The L087 version has gold lacquer inside and outside. However, the L811 datasheet lists no inner coating and an enamel outer finish. This is a key difference between these two 500 ml olive oil containers. The Z3 family also lists metal thicknesses of 0.22, 0.24 and 0.25 mm and several lacquer choices. These family options are not standard on every finished version. Food-contact suitability must be confirmed separately, especially for the version without an inner coating.

Wholesale Olive Oil Tins and Custom Printing

For wholesale olive oil tins, buyers should specify the product code, metal thickness, inner coating, closure, printing requirements and quantity together. Kontensan's metal offset printing facilities can support custom printed olive oil tins on suitable configurations. However, custom printing is not confirmed as standard on L087 or L811. Empty olive oil tin prices should be compared only when technical specifications match. Export buyers must also review food-contact and labeling requirements in the destination market.

Why Choose a 500 ml Olive Oil Tin?

A half-liter olive oil container can suit brands selling smaller portions or offering several product ranges. The metal surface blocks light, while suitable storage temperature, secure sealing and hygienic filling remain important for oil quality.

Frequently Asked Questions - FAQ

Is the Z3 olive oil tin a one-liter or 500 ml product?

The supplied datasheet identifies Z3 as a half-liter product, with a mold capacity range of 0.2 to 0.8 liters. It does not support a one-liter capacity.

How tall are the 500 ml Z3 olive oil tins?

The L087 version is 150 mm high, and the L811 version is 160 mm high. Both hold 500 ml.

Do both 500 ml versions have a gold-lacquered interior?

No. L087 has a gold-lacquered inner surface, while L811 lists no inner coating. Food-contact suitability should be checked separately.
