Product Description

1.2 L Tea and Coffee Tin

The 1.2 L Tea and Coffee Tin is a compact, round metal tin that stands out with its hinged slip-on lid. With a Ø75 mm diameter and 66 mm height, it suits fill volumes ranging from 0.35 to 0.6 liters. This product belongs to the Tea, Coffee, and Hot Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

Hinged-Lid Tea and Coffee Tin

This tea tin has a practical structure in which the lid is attached to the body with a hinge. The lid is not lost while opening and closing, which makes it easy to take tea and coffee in daily use. Its compact form suits single-serve presentation and use as a gift coffee tin.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the slip-on lid reduces air contact and supports freshness. Gold lacquer and offset printing options also offer a nostalgic vintage tin look.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. Metal offset printing applies a custom brand design to the outer surface.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Production in alternative moulds such as 500 ml and 300 ml is also possible.

Frequently Asked Questions - FAQ

What is a hinged-lid tin?

A hinged lid is a lid fixed to the body that can be opened and closed. The lid is not lost, which gives practical use in tea and coffee tins that are opened repeatedly.

How to store coffee in a tin can?

Coffee should be kept in a cool, dry place away from light. A hinged metal coffee tin blocks light and is easily closed after each use, reducing air contact.

In which volumes is this tea and coffee tin produced?

The standard mould is in the 0.35 – 0.6 liter range. Alternative hinged sizes of 500 ml and 300 ml are also available.

Can a vintage-look tea tin be produced?

Yes. With gold lacquer and offset printing options, nostalgic, vintage-style tea and coffee tins can be produced.
