Product Description

1.2 L Tea and Coffee Tin

The 1.2 L Tea and Coffee Tin is a metal tea tin that stands out with its round body and dome lid option. With a Ø90 mm diameter and 36 mm body height, it suits fill volumes ranging from 0.2 to 1.2 liters. This product belongs to the Tea, Coffee, and Hot Flavor

Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

Dome-Lid Tea and Coffee Tin

This tea tin gains height and a premium look with its dome lid option; a slip-on lid option is also available. Its compact round form is ideal for the gift presentation of tea, coffee and confectionery. As a printed coffee tin, it strengthens shelf value.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the slip-on lid reduces air contact and supports freshness. A metal coffee tin provides an elegant presentation even in small volumes.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. Metal offset printing applies a custom brand design to the body, while the dome lid adds height and elegance to the presentation.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Production in alternative moulds such as 1 L and 300 ml is also possible.

Frequently Asked Questions - FAQ

What advantage does a dome-lid tin provide?

A dome lid is a raised form on top of the tin. It gives the product volume and a premium look and stands out in gift and shelf presentations.

How much product fits in a 0.2–1.2 liter tin?

Capacity depends on the product's density and the chosen lid. This range suits single-serve and small-volume tea and coffee presentations.

Does a tin box keep tea and coffee fresh?

The metal body blocks light completely, while the slip-on lid reduces air contact. In this way, the freshness of the content is supported.

Is it suitable for gift and decorative presentation?

Yes. With its dome lid and printing options, it stands out as a decorative, premium gift tea and coffee tin.
