Product Description

1.2 Liter Tea and Coffee Tin

The 1.2 Liter Tea and Coffee Tin is a compact metal tea tin that stands out with its slim, tall form. With a 65 × 85 mm base and 120 mm height, it has a fill volume of 0.5 liters (500 ml). This product belongs to the Tea, Coffee, and Hot Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

The Advantage of the Slim Tall Tea and Coffee Tin

This tea tin takes up little shelf space and offers an elegant look thanks to its narrow base and tall body. Its compact form is ideal for single-serve tea, coffee and sample presentations. As a printed coffee tin, it strengthens brand value for gift and premium products.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the slip-on lid reduces air contact and supports freshness. A metal coffee tin provides safe storage even in small volumes.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. The tall outer surface suits custom vertical brand designs with metal offset printing.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Production in different sizes and forms is also possible.

Frequently Asked Questions - FAQ

What is the advantage of the slim tall tea tin?

The narrow base and tall body take up little shelf space and give an elegant presentation. This form is ideal for single-serve tea, coffee and sample products.

How much coffee fits in a 0.5 liter tin?

Capacity depends on the product's density. The 0.5 liter volume corresponds to roughly 250 grams of ground coffee, or a smaller amount of lighter tea.

How to store coffee in a tin can?

Coffee should be kept in a cool, dry place away from light. A metal coffee tin blocks light, while the slip-on lid reduces air contact and protects the aroma.

Can it be used as a gift?

Yes. With its slim tall form and printing options, it suits premium tea and coffee gifts.
