Product Description

1.2 L Tea and Coffee Tin

The 1.2 L Tea and Coffee Tin is a decorative, corded metal tea tin that stands out with its shallow, round form. With a Ø87 mm diameter and 36 mm height, it suits fill volumes ranging from 0.25 to 1 liter. This product belongs to the Tea, Coffee, and Hot Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

What Is the 1.2 L Tea and Coffee Tin Used For?

This tea tin is ideal for small portions of dry foods such as tea, coffee, Turkish delight, chocolate, and confectionery. Its shallow form makes stacking easy, while its decorative cordon gives a premium look in gift presentations. As a printed coffee tin, it strengthens shelf value.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the slip-on lid reduces air contact and supports freshness. This makes a metal coffee tin a practical option for short-term storage and presentation.

Printing, Cordon and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel, and pigment lacquer. The decorative cordon adds an elegant frame to the lid and body. Metal offset printing applies a custom brand design to the outer surface.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. An alternative 125 mm tall mould can also be produced to fit your needs.

Frequently Asked Questions - FAQ

What is this tea and coffee tin suitable for?

It suits small portions of tea and coffee as well as Turkish delight, chocolate, confectionery and nuts. Its shallow form is an advantage in gift and shelf presentations.

What is a decorative cordon?

A decorative cordon is a frame-shaped bead applied to the body or lid of the tin. It adds visual richness and also brings structural strength.

How much product fits in a 0.25–1 liter tin?

Capacity depends on the product's density. The shallow form suits the tidy presentation of small amounts of tea, coffee or confectionery.

Can a slip-on lid tin be reclosed?

Yes. The slip-on lid can be reclosed after opening and reduces air contact, supporting the freshness of the content.
