Product Description

1.4 Liter Cookies and Baklava Tin Box

The 1.4 liter cookies and baklava tin box EM is a compact metal food packaging solution designed to protect, transport, and present cookies, baklava, and syrup-based desserts. The EM mold has a diameter of 75 mm, a length of 100 mm, and a height of 36 mm. The technical sheet states an applicable volume range of 0.25–1.4 liters for this mold. Crystal lid and slip lid options allow brands to choose between visible product presentation and a classic metal tin appearance. A wire mechanism handle/hinge option can also be applied, adding flexibility for transport and presentation. Manufactured by Kontensan, this model is suitable for food brands looking for a cookies tin, baklava tin, or customizable metal box with a durable structure and flexible branding options.

Key Features of the Cookies and Baklava Tin Box

Metal Packaging Structure for Food Products

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes subcategory. The available 0.24 mm and 0.25 mm metal thickness options create a balanced body that helps the box keep its form. Its lock-seamed construction provides a clean body connection. The box has no hole, seam coating, or bead. This technical structure supports standardized serial production for wholesale cookie tin and wholesale baklava tin orders.

Crystal Lid, Slip Lid and Wire Mechanism

The EM mold can be produced with either a crystal lid or a slip lid. A crystal lid keeps the food visible and can improve shelf presentation for cookies, baklava, and syrup-based desserts. A slip lid gives the package a more traditional metal tin appearance. The technical sheet also states that a wire mechanism handle/hinge can be applied. This option can add functional value to gift cookie tins and special presentation packaging.

Offset Printing and Coating Options

The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, and decorative gold lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options make the box suitable for printed baklava tins and branded cookie tins that need a clear visual identity.

Applications and Brand Value

The 1.4 liter cookies and baklava tin box can be used for cookies, baklava, syrup-based desserts, boutique food products, regional specialties, and corporate gift packaging. Its compact dimensions are useful for portioned or premium product presentation. Because the metal surface supports offset printing, the box can work as both protective packaging and a long-lasting brand communication surface. The reusable metal structure can also extend the life of the package after the food is consumed. Kontensan combines lid, lacquer, printing, and wire mechanism options with serial production capability, giving food brands a practical way to balance technical function with strong shelf presentation.

Frequently Asked Questions - FAQ

What are the dimensions of the 1.4 liter cookies and baklava tin box?

The EM mold has a diameter of 75 mm, a length of 100 mm, and a height of 36 mm. The technical sheet states an applicable volume range of 0.25–1.4 liters.

Which lid options are available?

The product can be manufactured with a crystal lid or a slip lid. The choice depends on whether visible product presentation or a classic metal tin appearance is preferred.

Can custom printing be applied to the box?

Yes. Offset printing and different lacquer options can be applied to the outer surface, allowing the package to be customized for the brand and product series.

Can a wire mechanism handle be used?

Yes. The technical sheet states that a wire mechanism handle/hinge option can be applied to the EM mold.
