Product Description

1.4 Liter Cookies and Baklava Tin Box
The 1.4 liter cookies and baklava tin box FH is a compact metal food package designed to protect, transport, and present cookies, baklava, syrup-based desserts, and similar food products. For the FH mold, the technical sheet states a diameter of 90 mm and a mold height of 36 mm. The same technical sheet gives an applicable volume range of 0.2–1.3 liters. However, the product name is defined as 1.4 L, so these two source values do not fully match. In this content, the product name is kept as provided and the technical volume range is stated separately. A slip lid provides simple opening and closing, while the lock-seamed body supports a clean structure suitable for serial production. Manufactured by Kontensan, this model is suitable for food brands looking for a cookies tin, baklava tin, or compact branded metal package.
Key Features of the Cookies and Baklava Tin Box
Lock-Seamed Compact Metal Packaging
This product is included in Kontensan's Food Tin & Metal Packaging main category and the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes subcategory. Available metal thickness options are 0.22 mm, 0.24 mm, and 0.25 mm. The body construction is lock-seamed and no seam coating is applied. The product has no hole, handle, hinge, or bead. This simple structure supports standardized production and a clean package appearance.
Practical Slip Lid
The FH mold uses a slip lid. This lid gives easy access to cookies, baklava, and similar products while keeping a traditional metal tin appearance. The alternative 300 ml sample product in the technical sheet also uses a slip lid. This structure is practical for boutique food, sample-size products, gift cookie tins, and smaller dessert packaging.
Offset Printing and Coating Options
The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow logos, product visuals, and corporate colors to be applied to the metal surface.
Technical Specifications
Diameter: 90 mm

Mold height: 36 mm

Applicable volume range stated in the technical sheet: 0.2–1.3 L

Nominal product volume in the product name: 1.4 L

Metal thickness: 0.22 mm / 0.24 mm / 0.25 mm

Lid: Slip lid

Body construction: Lock-seamed

Seam coating: None

Form / bead: None

Alternative sample: 300 ml, 60 mm height

Applications and Brand Value
The 1.4 liter cookies and baklava tin box can be used for cookies, baklava, syrup-based desserts, premium food products, regional specialties, and corporate gift sets. Its 90 mm diameter creates a narrow and taller package form. Because the metal surface supports offset printing, the box can work as both protective packaging and a strong brand communication surface. Kontensan combines different lacquer and printing options with serial production capability, giving food brands a flexible solution for smaller-volume packaging.
Frequently Asked Questions - FAQ
What are the dimensions of the 1.4 liter cookies and baklava tin box?
The FH mold is listed with a diameter of 90 mm and a mold height of 36 mm.
What is the applicable volume range of the FH mold?
The technical sheet states an applicable volume range of 0.2–1.3 liters for the FH mold. Because the product name is given as 1.4 L, the source contains a volume inconsistency.
Is this model lock-seamed?
Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.
Can custom printing be applied to the box?
Yes. Offset printing and different lacquer options can be applied to the outer surface, allowing the package to be customized for the brand and product series.
