Product Description

1.4 Liter Nuts Tin

The 1.4 liter nuts tin FR is a metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. The product name is given as 1.4 L, while the FR technical sheet describes the product as 1/4 L and states a volume of 0.25 L. The same sheet lists a 68 mm diameter, 93 mm length, and 60 mm mold height. For that reason, the product name and technical sheet information are kept separate. A crystal lid improves product visibility, while the lock-seamed body supports clean serial production. The embossed body adds a different visual and tactile detail to the nuts tin. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or compact branded metal package.

Key Features of the 1.4 Liter Nuts Tin

Crystal Lid for Better Product Visibility

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. The FR nuts tin uses a crystal lid. This lid allows the product to be seen inside the package, which can support premium nut, regional specialty, and gift packaging presentations.

Lock-Seamed Nuts Tin Body with Embossing

The FR nuts tin uses a lock-seamed body, and the technical sheet states that no seam coating is applied. The product has no handle or hinge. The form / bead field lists body embossing. This detail gives the metal surface a more distinctive visual and tactile character. Available metal thickness options are 0.22 mm, 0.24 mm, and 0.25 mm.

Offset Printing and Coating Options

The nuts tin inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow product visibility and brand design to work together in premium pistachio, nut, and export packaging projects.

Applications and Brand Value

The 1.4 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. The crystal lid improves product visibility, while the embossed body gives the nuts tin stronger visual character. Offset printing turns the outer metal surface into a visible brand communication area. Kontensan combines coating and printing options with serial production capability, making this nuts tin suitable for retail, export, corporate gift, and wholesale projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 1.4 liter nuts tin?

The FR technical sheet lists a 68 mm diameter, 93 mm length, and 60 mm mold height.

What volume is listed in the technical sheet?

The technical sheet describes the product as 1/4 L and lists a volume of 0.25 L. The source product name is 1.4 L, so these two source statements are kept separate.

What lid does this nuts tin use?

The technical sheet lists a crystal lid, which supports product visibility inside the package.

Does this nuts tin have body embossing?

Yes. The technical sheet lists body embossing in the form / bead field.
