1/4 Liter Olive Oil Tin Can Z2

Z2

Technical Specifications

Mold Code	Z2
Diameter	50
Length	63
Height	60
Volume	0.2 - 0.7 lt

Applicable Features

Kalınlık

0,22 mm · 0,24 mm · 0,25 mm

İç Kaplama

Silverlaklı · Gold Laklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Krem Laklı · Dekoratif Gold Laklı · Gri Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Emaye · Çift Laklı · Ofset Baskılı · Şeffaf Laklı · Dekoratif Gold Laklı · Yok

Delik

Ø24 mm

Kapak

Pratik 24 mm

Kulp / Menteşe

Yok

39

Yok

Dikiş/Kenet

Dikişli

Dikiş Kaplama

Yok

Forma / Kordon

Yok

Product Description

1/4 Liter Olive Oil Tin Can Z2

1/4 Liter Olive Oil Tin Can Z2 is a family of metal containers considered for smaller olive oil portions. Kontensan offers this product group within Olive Oil Tin Cans under Food Tin & Metal Packaging. When selecting olive oil packaging, producers should check actual fill capacity, closure type, inner coating and finished dimensions rather than relying on the volume label alone. Buyers of empty olive oil tins need to distinguish mold specifications from the features of a finished product. This distinction matters for filling and shipping plans.

Technical Structure of the Small Olive Oil Tin

The Z2 datasheet names this mold family as 1/4 liter. It lists a diameter of 50 mm, a length of 63 mm, a reference height of 60 mm and a capacity range of 0.2 to 0.7 liters. The 1.4-liter name therefore cannot be confirmed from this datasheet. Its finished product example is K112, a 300 ml olive oil container. K112 measures 90 mm high and uses 0.22 mm sheet metal. Its inner and outer surfaces have gold lacquer, the body is seamed, and it uses a 24 mm practical closure. The cap color is green, with no handle or shaped reinforcement. K112's 300 ml capacity must not be presented as the dimensions of a finished 250 ml product.

What Matters for 24 mm Closures and Lacquer?

The Z2 family lists 0.22, 0.24 and 0.25 mm metal thicknesses and several inner and outer lacquer finishes. These family options are not standard on every finished version. The documented mold opening is 24 mm, with a matching practical closure. Metal packaging limits direct light exposure, but secure sealing, suitable storage temperature and food-contact suitability still matter. Buyers should confirm that the selected inner finish is appropriate for their olive oil filling conditions before ordering.

Wholesale Empty Olive Oil Tins and Custom Printing

For wholesale olive oil tins, suppliers and buyers should agree on product code, nominal and actual filling capacity, metal thickness, coating, closure and quantity. Kontensan's metal offset printing facilities can support custom printed olive oil tins on suitable configurations. However, custom printing is not documented as standard on K112. Empty olive oil tin prices should be compared only when technical specifications match. Exporters must also check food packaging and labeling requirements in the destination market.

Frequently Asked Questions - FAQ

Is the Z2 olive oil tin a 1.4-liter product?

No. The datasheet identifies Z2 as a quarter-liter family with a capacity range of 0.2 to 0.7 liters. It does not confirm 1.4 liters.

What are the height and capacity of the K112 version?

The finished K112 model holds 300 ml and is 90 mm high. The mold's 60 mm measurement is a reference height.

What closure does the Z2 olive oil container use?

The K112 version uses a 24 mm practical closure with a green cap. Other configurations must be confirmed separately.
