Product Description

1.4 L Slip Lid Tea and Coffee Tin

The 1.4 L Slip Lid Tea and Coffee Tin is a mini-size metal coffee tin with a Slip Lid body and an easy-open aluminum lid. With a Ø83 mm diameter and 35 mm height, it suits fill volumes ranging from 0.2 to 1.5 liters. This product belongs to the Tea, Coffee, and Hot

Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

Slip Lid Body and Easy-Open Lid

The Slip Lid tea tin is a body joint without welding. The easy-open aluminum lid provides a ring-pull, can-type closure so the content can be sealed airtight. Its mini size is ideal for single-serve and sample coffee presentations; slip-on and open-mouth options are also available.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the easy-open aluminum lid minimizes air contact. In this way, a metal coffee tin protects the freshness of coffee even in small volumes.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. Metal offset printing applies a custom brand design to the outer surface.

Durability and Food Safety

The Slip Lid body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Production in alternative moulds, such as a 750 ml slip-on lid version, is also possible.

Frequently Asked Questions - FAQ

What is a mini (1/4 liter) tin suitable for?

It suits single portions, samples and small amounts of coffee and tea. The easy-open lid is practical for can-type single-serve presentations.

What do a Slip Lid and an easy-open lid provide together?

The Slip Lid gives a weld-free yet strong body, and the easy-open aluminum lid gives an airtight closure. Together they form a can-type coffee tin.

Can this tin be sealed airtight?

Yes. When produced with the easy-open aluminum lid, the content can be sealed airtight; this protects the freshness of coffee.

Can custom brand printing be applied?

Yes. With metal offset printing and various lacquer options, custom, printed Slip Lid tea and coffee tins can be produced.
