Product Description

1.4 Liter Tea and Coffee Tin

The 1.4 L Tea and Coffee Tin is a mini metal tea tin that stands out with its embossed body and crystal lid. With a 68 × 93 mm base and 60 mm height, it has a fill volume of 0.25 liters. This product belongs to the Tea, Coffee, and Hot Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

Embossed-Body and Crystal-Lid Tea and Coffee Tin

This tea tin offers a tactile, premium look thanks to the embossed (relief) pattern on its body. The crystal lid lets the content be seen from outside. With its small volume, it is ideal for samples, single portions and gift presentations; it can also be used as a printed coffee tin.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the lid reduces air contact and supports freshness. A metal coffee tin provides an elegant presentation even in small volumes.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. Metal offset printing applies a custom brand design to the body, while the embossed body adds a three-dimensional texture to the print.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Production in different sizes and forms is also possible.

Frequently Asked Questions - FAQ

What is an embossed (relief) body?

An embossed body is a three-dimensional pattern applied to the surface of the tin. It gives the product a tactile texture and a premium look.

What is a crystal-lid mini tin suitable for?

The crystal (clear) lid keeps the content visible; with its small volume, it suits samples, single portions and gift tea and coffee presentations.

How much product fits in a 0.25 liter tin?

Capacity depends on the product's density. The 0.25 liter volume is ideal for samples and single-serve presentations.

Is it suitable for gift and sample use?

Yes. With its embossed body and crystal lid, it stands out as a premium gift and sample tea and coffee tin.
