Product Description

1.5 L Cookies and Baklava Tin Box

The 1.5 L Cookies and Baklava Tin Box is a cornered metal box designed for baklava, cookies and syrup-based desserts, with a locking-mechanism lid and a decorative cordon. With a 158 × 158 mm cornered base and 38 mm height, it suits fill volumes ranging from 1 to 2.7 liters. This product belongs to the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

Locking-Mechanism Baklava Tin

This baklava tin offers a secure closure with a locking mechanism that fixes the slip-on lid; this keeps the lid from opening while carrying syrup-based desserts. The decorative cordon adds an elegant look. The cornered flat form makes it easy to lay baklava slices flat, and it is also suitable for dry desserts such as cookies.

Uses

The cookies and baklava tin box suits dessert makers, patisseries and gift producers. With its locking mechanism and decorative cordon, it stands out in gift presentations that need secure carrying.

Printing and Coating Options

A printed baklava tin can be produced with a wide range of internal and external coatings such as silver lacquer, gold lacquer, enamel, pigment lacquer and decorative gold lacquer. Metal offset printing allows festive and custom-brand designs to be applied to the wide lid surface.

Leak Resistance and Food Safety

The clinch-seam cornered body, the locking mechanism and food-grade lacquer systems support leak resistance and hygiene for syrup-based contents throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal dessert boxes from Türkiye to more than 30 countries. Production in alternative sizes such as 1.5 L and 1 L is also possible.

Frequently Asked Questions - FAQ

What does the locking mechanism do?

The locking mechanism fixes the slip-on lid to the body and prevents it from opening during transport. This is an advantage especially for carrying syrup-based desserts safely.

How much dessert fits in a 1.5 liter baklava box?

With a height that varies, the mould offers filling from 1 to 2.7 liters. The amount varies with the type of baklava, cookies or syrup-based dessert and how it is arranged.

What does the decorative cordon provide?

The decorative cordon is a frame-shaped bead applied to the body and lid of the tin; it adds visual richness and brings structural strength.

Can custom festive printing be applied?

Yes. With metal offset printing, festive, gift and custom-brand designs can be applied to the wide surface.
