Product Description

1.5 Liter Cookies and Baklava Tin Box

The 1.5 liter cookies and baklava tin box NA is a compact metal food package designed to protect, transport, and present cookies, baklava, syrup-based desserts, and similar food products. For the NA mold, the technical sheet states a diameter of 140 mm and

a mold height of 35 mm. The same mold supports an applicable volume range of 0.5–3.7 liters. The lid can be produced as a knob lid or a slip lid. The lock-seamed body supports standardized production, while different lacquer and offset printing options allow the package to match the brand identity. Manufactured by Kontensan, this model is suitable for food brands looking for a cookies tin, baklava tin, or compact branded metal package.

Key Features of the Cookies and Baklava Tin Box

Knob Lid or Slip Lid Options

The NA mold supports both knob lid and slip lid options. These two lid types create different presentation styles depending on the product and brand preference. A knob lid can give the package a more decorative look, while a slip lid offers simple and practical use. The 1.5 L sample product is listed with a slip lid in the technical sheet.

Lock-Seamed Metal Food Packaging

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes subcategory. The available 0.24 mm and 0.25 mm metal thickness options help the tin keep a stable form. The body construction is lock-seamed and no seam coating is applied. The mold specifications also state that there is no hole, handle, or hinge.

Offset Printing and Coating Options

The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer.

Applications and Brand Value

The 1.5 liter cookies and baklava tin box can be used for cookies, baklava, syrup-based desserts, premium food products, regional specialties, and corporate gift sets. Its 140 mm diameter creates a compact, taller package form. Because the metal surface supports offset printing, the box can work as both protective packaging and a strong brand communication surface. Kontensan combines lid, lacquer, and printing options with serial production capability, giving food brands a flexible solution for smaller-volume packaging.

Frequently Asked Questions - FAQ

What are the dimensions of the 1.5 liter cookies and baklava tin box?

The NA mold is listed with a diameter of 140 mm and a mold height of 35 mm. The 1.5 L sample product is listed with a height of 100 mm.

What is the applicable volume range of the NA mold?

The technical sheet states an applicable volume range of 0.5–3.7 liters for the NA mold.

Which lid options are available?

The technical sheet lists knob lid and slip lid options. The 1.5 L sample product uses a slip lid.

Is this model lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.
