Product Description

1.5 Liter Nuts Tin

The 1.5 liter nuts tin CJ is a metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. For the CJ mold, the technical sheet states a 140 mm diameter, 240 mm length, and 36 mm mold height. The same mold supports an applicable volume range of 1.2–3 liters. A slip lid gives the nuts tin simple opening and closing, while the lock-seamed body supports clean serial production. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or branded metal nut package with a longer body profile and medium-volume format.

Key Features of the 1.5 Liter Nuts Tin

Longer Form and Wide Printing Surface

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. Its 140 × 240 mm dimensions give the nuts tin a longer surface ratio and create a broad area for branding. The 1.2–3 L applicable volume range also allows the same mold family to support different filling quantities.

Slip Lid and Lock-Seamed Nuts Tin Body

The CJ nuts tin uses a slip lid. The body construction is lock-seamed, and the technical sheet states that no seam coating is applied. The product has no hole, handle, hinge, or bead. Available metal thickness options are 0.24 mm and 0.25 mm. This clean structure keeps the nuts tin practical for serial production.

Offset Printing and Coating Options

The nuts tin inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow the nuts tin to carry logos, product visuals, and brand colors for pistachio exports, premium nut ranges, and wholesale packaging.

Applications and Brand Value

The 1.5 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. Its longer body profile creates a different shelf appearance, while the broad metal surface supports strong offset printing. Kontensan combines lacquer and printing options with serial production capability, making this nuts tin suitable for retail, export, corporate gift, and wholesale projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 1.5 liter nuts tin?

The CJ mold is listed with a 140 mm diameter, 240 mm length, and 36 mm mold height. The alternative 1.5 L sample product is listed with a height of 43 mm.

What volume range is available for this nuts tin?

The technical sheet states an applicable volume range of 1.2–3 liters for the CJ mold.

Is this nuts tin lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.

Can custom printing be applied to the nuts tin?

Yes. Offset printing and different lacquer options can be applied to the outer surface, allowing the nuts tin to be customized for the brand and product series.
