Product Description

1.5 Liter Slip Lid Cookies and Baklava Tin Box

The 1.5 liter slip lid cookies and baklava tin box RA is a metal food package designed to protect, transport, and present cookies, baklava, syrup-based desserts, and similar products. For the RA mold, the technical sheet states a diameter of 215 mm and a

mold height of 35 mm. The same mold supports an applicable volume range of 1.2–8 liters. The body is lock-seamed and the package uses a slip lid. A decorative bead can also be applied, helping the package stand out in premium and gift presentations. Manufactured by Kontensan, this model is suitable for food producers looking for a cookies tin, baklava tin, or branded metal package that combines a stable body with flexible printing and coating options.

Key Features of the Slip Lid Cookies and Baklava Tin Box

Lock-Seamed Metal Food Packaging Structure

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes subcategory. The available 0.24 mm and 0.25 mm metal thickness options help the tin keep a stable form. The body construction is lock-seamed and no seam coating is applied. According to the technical sheet, the product has no hole, handle, or hinge. This simple structure is suitable for wholesale cookie tin and wholesale baklava tin projects where serial production and a clean package appearance are important.

Slip Lid and Decorative Bead

The 1.5 L model uses a slip lid. This lid provides simple opening and closing while keeping a traditional metal tin appearance. The RA mold can also be produced with a decorative bead, adding a visible detail to the package form. This feature can strengthen the premium look of gift cookie tins, dessert tins, and corporate gift packaging.

Offset Printing and Coating Options

The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options give brands more freedom to use logos, product visuals, and corporate colors on printed baklava tins and branded cookie tins.

Applications and Brand Value

The 1.5 liter slip lid cookies and baklava tin box can be used for cookies, baklava, syrup-based desserts, premium food products, regional specialties, and corporate gift sets. Its 215 mm diameter supports organized product presentation across a wide surface. Because the metal surface supports offset printing, the box can work as both protective packaging and a strong brand communication surface. The decorative bead can add visual character to the package. Kontensan combines lacquer and printing options with serial production capability, giving food brands a practical way to balance technical function with strong shelf presentation.

Frequently Asked Questions - FAQ

What are the dimensions of the 1.5 liter slip lid tin box?

The RA mold is listed with a diameter of 215 mm and a mold height of 35 mm. The 1.5 L sample product is listed with a height of 50 mm.

What is the applicable volume range of the RA mold?

The technical sheet states an applicable volume range of 1.2–8 liters for the RA mold. The 1.5 L product is one option within this mold family.

Is this model lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.

Can a decorative bead be applied?

Yes. The technical sheet states that the RA mold can be produced with a decorative bead.
