Product Description

1.5 L Tea and Coffee Tin

The 1.5 L Tea and Coffee Tin is a round metal storage tin that protects the aroma of tea and coffee with its slip-on lid. With a Ø105 mm diameter and 140 mm height, it has a fill volume of 1.5 – 1.8 liters. This product belongs to the Tea, Coffee, and Hot Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

What Is the 1.5 L Tea and Coffee Tin Used For?

This tea tin is designed to store tea, coffee and similar dry foods. The opaque metal body and a snug slip-on lid reduce contact with air and light, supporting freshness. As a printed coffee tin, it also adds value to brands on the retail shelf and in gift presentations.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content thanks to its opaque body, while a metal coffee tin limits air contact with its slip-on lid, holding the scent for longer.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. Metal offset printing allows a custom brand design on the outer surface. A transparent lacquer option keeps the natural look of the metal.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. An alternative 160 mm tall mould can also be produced to fit your needs.

Frequently Asked Questions - FAQ

How to store coffee in a tin can?

Coffee should be kept in a cool, dry place away from light. A metal coffee tin blocks light completely, while the slip-on lid reduces air contact and helps protect the coffee's aroma.

Should tea be stored in a tin can or a glass jar?

A tin can is opaque, while a glass jar lets light through. Since the color and aroma of tea are affected by light, a tea tin is an advantage in terms of light protection.

How much tea or coffee fits in a 1.5 liter tin?

Capacity depends on the product's density. A 1.5 liter volume corresponds to roughly 0.5 – 0.7 kg of ground coffee, or a smaller amount of lighter loose tea.

Is the slip-on lid airtight?

The slip-on lid fits snugly and reduces air and light contact; however, for full airtightness, gasketed or inner-lid solutions should be considered separately.
