1 Liter Cheese and Butter Tin Pails EA

EA

Technical Specifications

Mold Code	EA
Diameter	87
Length	87
Height	65
Volume	0.5 - 2.1 lt

Applicable Features

Kalınlık

0,22 mm · 0,24 mm · 0,25 mm

İç Kaplama

Silverlaklı · Gold Laklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Krem Laklı · Dekoratif Gold Laklı · Gri Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Emaye · Çift Laklı · Ofset Baskılı · Şeffaf Laklı · Dekoratif Gold Laklı · Yok

Delik

Yok

Kapak

Kolay Açılır (Alüminyum) · Yok (Ağzı Açık)

Kulp / Menteşe

Yok

39

Yok

Dikiş/Kenet

Dikişli

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Yok

Product Description

1 Liter Cheese and Butter Tin Pails EA

1 Liter Cheese and Butter Tin Pails EA belong to a metal packaging family designed for presenting smaller quantities of dairy products. Kontensan offers this model in its Cheese, Butter Tin Cans, and Pails range under Food Tin & Metal Packaging. The range includes options for cream, clarified butter and other dairy products when their suitability is confirmed. Each package should match the filling process. For buyers looking for an empty cheese tin, the correct choice depends not only on capacity but also on the closure and internal food-contact coating.

Which Foods Can a One-Liter Dairy Tin Hold?

The EA family includes options for products such as cream and clarified butter. Businesses looking for an empty cheese tin for white cheese or brined products may also review this category. However, the same lacquer should not be assumed suitable for every type of food. Salt content, fat level, filling temperature and storage period all affect food-contact coating requirements. These checks help ensure compatibility between the food and its package.

Technical Features of the Cheese and Butter Tin

The EA mold datasheet lists a diameter of 87 mm, a length of 87 mm and a reference height of 65 mm. Its capacity range is 0.5 to 2.1 liters. The exact height of the one-liter version must be confirmed separately. Available sheet thicknesses are 0.22 mm, 0.24 mm and 0.25 mm. Internal finishes include gold, silver and different pigment lacquers. Exterior options include lacquer, enamel and offset printing. The body has a seam and no handle, hinge or reinforcing bead. Easy-open aluminum lids and open-top versions are included among the options.

Easy-Open Lid and Printed Dairy Packaging

An easy-open aluminum lid is one of the closing options within the mold family. Offset printing can also display a brand name and packaging design on the outer metal surface. The K108 cream and clarified butter sample in the datasheet has a 500 ml volume, a 75 mm height and 0.24 mm sheet metal. Its dimensions must not be presented as confirmed measurements for the one-liter version. The final combination of lid and printing must be agreed before production.

What to Check Before Ordering Wholesale Dairy Tins

When ordering wholesale empty cheese tins or smaller dairy packages, buyers should check actual filling volume, metal thickness, internal lacquer, seam protection and lid type together. Choosing a supplier of tin cans for dairy products based on unit price alone is not enough. Kontensan has manufactured metal packaging since 1980. Sample filling tests and food-contact verification help determine the right configuration, especially when the same packaging range serves different dairy products.

Frequently Asked Questions - FAQ

What is the diameter of the one-liter dairy tin?

The EA mold family has a diameter of 87 mm. The final height of the one-liter version should be confirmed before ordering.

Which metal thicknesses are available?

The EA range includes 0.22 mm, 0.24 mm and 0.25 mm sheet metal options.

Does the tin have a handle or easy-open lid?

There is no handle in the EA range. Easy-open aluminum lids and open-top versions are listed, depending on the selected configuration.
