Product Description

1 Liter Cookies and Baklava Tin Box
The 1 liter cookies and baklava tin box MA is a narrow metal food package designed to protect, transport, and present cookies, baklava, syrup-based desserts, and similar products. For the MA mold, the technical sheet states a diameter of 105 mm and a

mold height of 36 mm. The same mold supports an applicable volume range of 0.3–2.3 liters. A crystal lid gives the package a different visual character, while the wire-mechanism handle and hinge structure supports easier carrying and use. Manufactured by Kontensan, this model is suitable for food brands looking for a cookies tin, baklava tin, or compact branded metal package with a taller body form.

Key Features of the Cookies and Baklava Tin Box

Crystal Lid for Distinctive Presentation

The general MA mold specification lists a crystal lid. This creates a different presentation style compared with standard metal lids. The technical sheet also lists a slip lid for the alternative 1 L sample product, so the main mold specification and the sample product configuration are kept separate in this content.

Wire-Mechanism Handle and Lock-Seamed Body

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Cookies, Baklava, and Syrup-Based Dessert Tin Boxes subcategory. The technical sheet lists a wire-mechanism handle/hinge and a lock-seamed body. No seam coating or bead is applied. The specified metal thickness for this model is 0.24 mm.

Offset Printing and Coating Options

The inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer.

Applications and Brand Value

The 1 liter cookies and baklava tin box can be used for cookies, baklava, syrup-based desserts, premium food products, regional specialties, and corporate gift sets. Its 105 mm diameter creates a narrow, taller package form. The wire-mechanism handle supports easier carrying, while offset printing turns the metal surface into an active brand communication area. Kontensan combines lacquer and printing options with serial production capability, giving food brands a distinctive small-volume packaging solution.

Frequently Asked Questions - FAQ

What are the dimensions of the 1 liter cookies and baklava tin box?

The MA mold is listed with a diameter of 105 mm and a mold height of 36 mm. The 1 L sample product is listed with a height of 150 mm.

What is the applicable volume range of the MA mold?

The technical sheet states an applicable volume range of 0.3–2.3 liters for the MA mold.

Which lid is used on this model?

The main mold specification lists a crystal lid. The alternative 1 L sample product is listed with a slip lid.

Does this model have a handle?

Yes. The technical sheet lists a wire-mechanism handle and hinge structure.
