Product Description

1 Liter Nuts Tin

The 1 liter nuts tin DA is a metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. For the DA mold, the technical sheet states a 158 mm diameter, 158 mm length, and 38 mm mold height. The same mold supports an applicable volume range of 0.9–2.8 liters. A slip lid gives the nuts tin simple opening and closing, while the lock-seamed body supports clean serial production. One of the distinctive features of this nuts tin is the decorative bead. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or branded metal nut package with a compact and decorative form.

Key Features of the 1 Liter Nuts Tin

Decorative Bead for Strong Shelf Presence

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. The decorative bead gives the nuts tin more visual character than a plain metal body and helps the package stand out on the shelf. Its 158 × 158 mm size supports a compact and organized presentation for nuts and regional food products.

Slip Lid and Lock-Seamed Nuts Tin Body

The DA nuts tin uses a slip lid. The body construction is lock-seamed, and the technical sheet states that no seam coating is applied. The product has no hole, handle, or hinge. Available metal thickness options are 0.24 mm and 0.25 mm. This simple structure keeps the nuts tin practical for serial production while maintaining a clean package appearance.

Offset Printing and Coating Options

The nuts tin inner surface can be produced with silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options allow the nuts tin to carry logos, product visuals, and brand colors for pistachio exports, premium nut ranges, and wholesale packaging.

Applications and Brand Value

The 1 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. Its compact size gives the nuts tin a balanced retail presentation, while the decorative bead adds visual identity. Because the outer metal surface supports offset printing, the nuts tin can also work as a strong brand communication surface. Kontensan combines lacquer and printing options with serial production capability, making this nuts tin suitable for retail, export, corporate gift, and wholesale projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 1 liter nuts tin?

The DA mold is listed with a 158 mm diameter, 158 mm length, and 38 mm mold height. The alternative 1 L sample product is listed with a height of 43 mm.

What volume range is available for this nuts tin?

The technical sheet states an applicable volume range of 0.9–2.8 liters for the DA mold.

Does this nuts tin have a decorative bead?

Yes. The technical sheet lists a decorative bead in the form / bead field.

Is this nuts tin lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.
