Product Description

1 Liter Nuts Tin

The 1 liter nuts tin FH is a metal food package designed to protect, transport, and present pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. For the FH mold, the technical sheet states a 90 mm diameter, 36 mm mold height, and an applicable volume range of 0.2–1.2 liters. A slip lid gives the nuts tin simple opening and closing, while the lock-seamed body supports clean serial production. The decorative bead adds stronger visual character to the metal surface. Manufactured by Kontensan, this nuts tin is suitable for brands looking for a nuts gift box, wholesale nuts tin, or branded metal package that combines a narrow diameter with a taller body profile.

Key Features of the 1 Liter Nuts Tin

Narrow Diameter and Tall Nuts Tin Form

This product is included in Kontensan's Food Tin & Metal Packaging main category and the Nuts Gift Boxes subcategory. Its 90 mm diameter and 36 mm mold height give the nuts tin a compact base. The technical sheet states a 0.2–1.2 L applicable volume range, allowing the same mold family to support different filling quantities. The alternative 1 L sample has an actual product height of 190 mm, which should be kept separate from the mold height.

Slip Lid and Lock-Seamed Nuts Tin Body

The FH nuts tin uses a slip lid. The body construction is lock-seamed, and the technical sheet states that no seam coating is applied. The product has no hole, handle, or hinge. Available metal thickness options are 0.22 mm, 0.24 mm, and 0.25 mm. This clean structure keeps the nuts tin suitable for serial production.

Decorative Bead and Offset Printing

The decorative bead adds visual movement to the metal surface and helps the nuts tin stand apart from plain-body alternatives. The inner surface can use silver lacquer, gold lacquer, spot lacquer, double lacquer, pigment lacquer, pigment lacquer + lacquer, double pigment lacquer, cream enamel lacquer, beige lacquer, clear lacquer, cream lacquer, decorative gold lacquer, or grey lacquer. The outer surface can use silver lacquer, gold lacquer, enamel, double lacquer, offset printing, clear lacquer, or decorative gold lacquer. These options give the nuts tin a strong base for branded pistachio, premium nut, and export packaging projects.

Applications and Brand Value

The 1 liter nuts tin can be used for pistachios, hazelnuts, almonds, cashews, mixed nuts, and regional food products. Its narrow diameter supports efficient shelf use, while the tall body creates a strong surface for branded design. The decorative bead gives the nuts tin more visual character, and offset printing turns the metal surface into a visible brand communication area. Kontensan combines coating and printing options with serial production capability, making this nuts tin suitable for retail, export, corporate gift, and wholesale projects.

Frequently Asked Questions - FAQ

What are the dimensions of the 1 liter nuts tin?

The FH technical sheet lists a 90 mm diameter and 36 mm mold height. The alternative 1 L sample product is listed with an actual height of 190 mm.

What volume range is available for this nuts tin?

The technical sheet states an applicable volume range of 0.2–1.2 liters for the FH mold.

Is this nuts tin lock-seamed?

Yes. The technical sheet identifies the body construction as lock-seamed and states that no seam coating is used.

Does this nuts tin have a decorative bead?

Yes. The technical sheet lists a decorative bead in the form / bead field.
