1 Liter Olives and Pickles Tin Box LA

LA

Technical Specifications

Mold Code	LA
Diameter	99
Height	38
Volume	0.3 - 2.2 lt

Applicable Features

Kalınlık

0,22 mm · 0,24 mm · 0,25 mm

İç Kaplama

Silverlaklı · Gold Laklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Krem Laklı · Dekoratif Gold Laklı · Gri Laklı · Yok

Dış Kaplama

Silverlaklı · Gold Laklı · Emaye · Çift Laklı · Ofset Baskılı · Şeffaf Laklı · Dekoratif Gold Laklı · Yok

Delik

Çember

Kapak

Sibop · Kolay Açılır (Alüminyum) · Yok (Ağzı Açık) · Orta Kapak

Kulp / Menteşe

Yok

39

Yok

Dikiş/Kenet

Dikişli

Dikiş Kaplama

İçi Dışı Laklı · İçi Toz Laklı Dışı Laksız · İçi Laklı Dışı Laksız · İçi Toz Laklı Dışı Laklı · İçi Laksız Dışı Laklı · Yok

Forma / Kordon

Salça Forma · Fıçı

Product Description

1 Liter Olives and Pickles Tin Box LA

1 Liter Olives and Pickles Tin Box LA is a metal packaging option for presenting olives in brine in smaller containers. Kontensan offers this product within Olives, and Pickles Tin Cans under Food Tin & Metal Packaging. When buying an empty olive tin, manufacturers should define not only the volume but also the internal lacquer, lid, body shape and filling conditions. Use for pickles depends on checking the product's salt and acid levels.

Dimensions and Body Versions of the 1 Liter Olive Tin

The LA mold family has a diameter of 99 mm, a reference height of 38 mm and a capacity range from 0.3 to 2.2 liters. However, the datasheet lists two finished one-liter products. L710 is 150 mm high, while K101 is 140 mm high. Both versions use 0.24 mm sheet metal, gold lacquer inside and outside, a seamed body and an easy-open aluminum lid. K101 has a barrel-shaped body, while L710 has no shaped reinforcement. Giving only one finished height for this family would therefore be misleading.

Choosing Coatings for Brined Olive Packaging

Brined olive packaging may have direct contact with salty liquid. The internal coating must therefore suit the recipe, acidity and storage period. The LA family lists metal thicknesses of 0.22, 0.24 and 0.25 mm, together with several lacquer options. These are family-level choices, not standard features on every one-liter version. For an empty pickle tin, manufacturers must also confirm that the selected coating is suitable for acidic food contact.

Easy-Open Lids and Wholesale Empty Olive Tins

Both L710 and K101 have an easy-open aluminum lid. The LA family also lists other closures, including a middle lid and open-top versions, but these are not the standard lids of the two products. Before ordering wholesale empty olive tins, buyers should confirm the product code, body shape, metal thickness, lacquer and printing needs. Kontensan's metal offset printing facilities can support branded packaging on suitable versions. Empty olive tin prices should be compared using matching technical specifications.

Does a 1 Liter Olive Tin Hold 1 Kilogram?

A one-liter container does not always hold one kilogram of olives. Fruit size, brine quantity and filling space change the net weight. Buyers searching for a 1 kg olive container should confirm the actual weight through a sample filling test.

Frequently Asked Questions - FAQ

How tall is the one-liter LA olive tin?
L710 is 150 mm high and K101 is 140 mm high. The 38 mm mold measurement is a reference value only.
Do the LA one-liter tins have easy-open lids?
Yes. Both the L710 and K101 one-liter versions are specified with easy-open aluminum lids.
Can the one-liter olive tin be used for pickles?
The selected inner lacquer must be confirmed as suitable for the pickle product's salt and acid levels before filling.
