## Product Description

1 Liter Paint & Thinner Tin Can LA

1 Liter Paint & Thinner Tin Can LA is a metal container family developed for manufacturers requiring different closure systems for small-volume paint packaging. Kontensan offers this product in its Paint & Thinner Tin Can range under Industrial and Chemical Tin Cans, Pails, and Drums. The one-liter L961 and L701 paint containers are specified with 0.24 mm sheet metal and a 42 mm opening. The main differences between these models are their finished heights and closure types. These options allow buyers to consider packaging designs according to filling and operating requirements.

1-Liter Paint Containers: Textured and Screw Closures

The L961 model is 160 mm high and features a textured Pratik 42 mm closure. The L701 model is 138 mm high and has a Pratik 43 mm screw closure. Both models have a nominal capacity of one liter, a 42 mm opening and 0.24 mm sheet metal. White is listed in the technical records. The LA mold family has a reference diameter of 99 mm, a reference height of 38 mm and a capacity range of 0.3–2.2 liters. Sheet metal options of 0.22 mm, 0.24 mm and 0.25 mm are available for welded paint container production. When ordering empty metal paint tins, consider finished dimensions and closure type together with filling equipment.

500 ml Paint Containers and Surface Coating Alternatives

The L085 paint container in the same family has a capacity of 500 ml, a height of 67 mm, 0.24 mm sheet metal and a ring-type paint lid. None of the three documented paint models has an inner or outer coating. The mold family, however, includes inner surface options such as pigment, gold, silver and clear lacquers, along with enamel and offset printed exterior finishes. When selecting metal paint tins with closures, consider chemical composition, compatibility with the inner surface and closure performance together. Suitability for thinner filling and any required dangerous goods transport approvals must be verified separately.

Wholesale Metal Paint Containers and Custom Printing

For metal paint packaging manufacturers, small-volume containers play an important role in planning product ranges for different sales channels. Kontensan has manufactured metal packaging since 1980 and exports to more than 30 countries. Its 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing lines support custom printed paint packaging in suitable configurations. Prices for wholesale empty paint tins depend on sheet thickness, closure system, coating, printing and order quantity. Share your packaging dimensions, product formulation and brand design to request a manufacturing quotation.

Frequently Asked Questions - FAQ

What is the height of the one-liter paint container?

L961 is 160 mm high and L701 is 138 mm high. Both use 0.24 mm sheet metal.

Which closures are available for the one-liter paint container?

The documented models feature a textured Pratik 42 mm closure and a Pratik 43 mm screw closure.

Is a 500 ml paint container available?
Yes. L085 has a height of 67 mm and a ring-type paint lid.
