Product Description

1 Liter Paint & Thinner Tin Can Z5

1 Liter Paint & Thinner Tin Can Z5 belongs to a product family designed for small-volume metal packaging in the paint and thinner industry. Kontensan offers this product in its Paint & Thinner Tin Can range under Industrial and Chemical Tin Cans, Pails, and Drums. The L086 model, specified for thinner, has a one-liter capacity, a finished height of 185 mm, 0.24 mm sheet metal and a Pratik 32 mm closure. Its handle-free design can be considered by manufacturers looking for small-volume packaging. For paint filling, packaging specifications should be selected according to the chemical composition of the contents.

Technical Features of the 1-Liter Paint Container

The Z5 mold family lists 58 mm and 115 mm in its diameter and length fields, with a reference height of 60 mm. Its capacity range is 0.4–1.4 liters, with sheet metal options of 0.22 mm, 0.24 mm and 0.25 mm. The welded body design has no separate shaping or ribbing. The finished L086 model uses 0.24 mm sheet metal and has a height of 185 mm. This model's height differs from the mold reference height. When sourcing empty paint tins, buyers should consider finished container dimensions alongside filling equipment, carton arrangements and shelf layouts. Capacity in liters is not the same as the filling weight in kilograms.

Handle-Free Thinner Packaging and Closure Options

The L086 thinner tin is specified with a 32 mm opening, a Pratik 32 mm closure and a red plug color. It has no handle, inner or outer coating, separate seam coating or body ribbing. The Z5 family also includes a 24 mm opening, a Pratik 24 mm closure and a vented Pratik 32 mm closure. Various inner lacquers, enamel and offset printed exterior finishes can also be considered within the family. When selecting metal paint tins with closures, chemical compatibility with the inner surface and closure material matters. L086 is specified for thinner and should not be assumed to suit every type of paint. Required packaging approvals for dangerous goods transport must be verified separately.

Wholesale Empty Paint Cans and Custom Printing

When sourcing one-liter metal containers, closure design, sheet metal thickness and brand design influence purchasing decisions alongside unit price. Kontensan has manufactured metal packaging since 1980. Its 25,000 square meters of indoor production space in Konya and Istanbul and metal offset printing facilities support custom printed paint packaging in suitable configurations. Printing is not listed as a standard feature of L086. When comparing paint tin manufacturers, use the same technical specification for each quotation. For wholesale empty metal paint tins, share your target capacity, product composition, print design and order quantity with Kontensan to request a manufacturing quotation.

Frequently Asked Questions - FAQ

What is the sheet metal thickness of the 1-liter thinner container?

L086 has 0.24 mm sheet metal and a finished height of 185 mm. The mold family also lists 0.22 mm and 0.25 mm options.

Which closure is used on the 1-liter thinner container?

L086 features a 32 mm opening and a Pratik 32 mm closure. It has no handle.

Can empty paint tins be custom printed?

Metal offset printing can be considered in suitable production configurations. The printing surface and design are agreed before ordering.
