Product Description

1 L Tea and Coffee Tin

The 1 L Tea and Coffee Tin is a flat metal tea tin that stands out with its crystal clear-window lid and wire-clip mechanism options. With a 75 × 100 mm base and 36 mm height, it suits fill volumes ranging from 0.25 to 1.4 liters. This product belongs to the Tea, Coffee, and Hot Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

Crystal-Lid Tea and Coffee Tin

This tea tin lets the content be seen from outside with its crystal (clear-window) lid option. In this way, tea and coffee are displayed on the shelf and brand visibility increases. The wire-clip mechanism offers a tight, secure closure; a hinged option is also available.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the lid options reduce air contact and support freshness. A metal coffee tin provides both protection and an eye-catching presentation.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. Metal offset printing applies a custom brand design to the body, while the crystal lid keeps part of the product visible.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Production in alternative moulds such as 500 ml is also possible.

Frequently Asked Questions - FAQ

What is a crystal-lid tea tin?

A crystal lid is a clear-window lid that lets the content be seen from outside. It is preferred for displaying tea and coffee on the shelf and for brand visibility.

What does the wire-clip mechanism do?

The wire-clip mechanism is a closure system that locks the lid to the body. It provides a tight, secure closure and helps reduce air contact.

How much product fits in this tea and coffee tin?

Capacity depends on the product's density. The 0.25 – 1.4 liter range suits single-serve presentation of tea or coffee.

What products is it suitable for?

It suits tea and coffee as well as confectionery, chocolate and nuts. The crystal lid is an advantage for premium products that need to be displayed.
