Product Description

1 L Tea and Coffee Tin JH

The 1 L Tea and Coffee Tin is a metal storage tin suitable for the kitchen counter, with an upright body and a hinged lid. With an 80 × 120 mm base and 120 mm height, it suits fill volumes ranging from 1.1 to 1.9 liters. This product belongs to the Tea, Coffee, and Hot Flavor Tin Boxes series under Kontensan's Food Tin & Metal Packaging main category.

Upright Tea and Coffee Tin for the Kitchen

This tea tin takes up little space on the kitchen counter thanks to its upright, stable form. The hinged lid allows easy one-handed opening and closing in daily use. It stands out as a practical coffee tin for the tidy storage of tea, coffee and similar dry foods.

Why Choose a Metal Tea and Coffee Tin?

Tea and coffee lose their aroma quickly when exposed to light, moisture and oxygen. A metal tea tin protects the content with its opaque body, while the hinged slip-on lid reduces air contact and supports freshness. A metal coffee tin provides both protection and convenience in daily use.

Printing and Coating Options

A printed tea tin can be produced with internal and external coatings such as silver lacquer, gold lacquer, enamel and pigment lacquer. The upright outer surface offers a wide area for a custom brand design with metal offset printing.

Durability and Food Safety

The clinch-seam body and food-grade lacquer systems support durability and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental and food safety management system certifications. With 46 years of manufacturing experience, it supplies metal tea and coffee tins from Türkiye to more than 30 countries. Production in different sizes and forms is also possible.

Frequently Asked Questions - FAQ

Can this tea and coffee tin be used in the kitchen?

Yes. Its upright form takes up little space on the kitchen counter, and its hinged lid allows easy one-handed opening and closing in daily use.

How much tea or coffee fits in a 1.1–1.9 liter tin?

Capacity depends on the product's density. This volume suits storing a whole pack of tea or coffee.

What is the advantage of the hinged lid?

The hinged lid is attached to the body; it is not lost and gives practical use in tea and coffee tins that are opened repeatedly.

Does a tin box keep tea and coffee fresh?

The metal body blocks light completely, while the hinged slip-on lid reduces air contact. In this way, the freshness of the content is supported.
