1 Liter Tea-Coffee Tin Box EA

EA

Technical Specifications

Mold Code	EA
Diameter	87
Length	87
Height	36
Volume	0.3 - 1.8 lt

Applicable Features

Kalınlık

0,24 mm · 0,25 mm

İç Kaplama

Silverlaklı · Puntalık Laklı · Çift Laklı · Pigment Laklı · Pigment Lak+Laklı · Çift Pigment Laklı · Krem Emaye Laklı · Bej Laklı · Şeffaf Laklı · Dekoratif Gold Laklı · Gri Laklı · Yok · Emaye · Gold Laklı · Krem Laklı

Dış Kaplama

Silverlaklı · Gold Laklı · Emaye · Çift Laklı · Ofset Baskılı · Dekoratif Gold Laklı · Yok · Şeffaf Laklı

Kapak

Geçme Kapak

Kulp / Menteşe

Yok

Kulp / Tapa Rengi

Yok

Forma / Kordon

Dekoratif Kordon

Product Description

1 Liter Tea-Coffee Tin Box EA
1 Liter Tea-Coffee Tin Box EA is a metal packaging family suitable for consideration when packing tea, coffee and dry food products. Kontensan offers it in Tea, Coffee and Hot Flavors under Industrial and Chemical Tin Cans, Pails, and Drums. The EA mold family covers capacities from 0.3 to 1.8 liters. The completed model detailed in the technical datasheet is the one-liter L479. It has a

finished height of 125 mm and uses 0.24 mm sheet metal. L479 has gold lacquer on both the inner and outer surfaces, a slip-on lid and a mechanically joined body. Its suitability for a particular filling application must be checked separately.

Dimensions and Volume of the Tea-Coffee Metal Box

The EA mold family lists a diameter and length of 87 mm, with 36 mm in the general height field. However, 36 mm is not the finished height of L479. The completed L479 model is 125 mm high and holds one liter. The family covers a capacity range of 0.3–1.8 liters and offers sheet thicknesses of 0.24 mm and 0.25 mm. L479 itself uses 0.24 mm sheet metal. When buying tea or coffee metal containers, volume in liters should not be confused with the filled weight in grams. Loose tea leaves and ground coffee have different bulk densities. The target weight should therefore be verified by a filling test with the selected container.

Gold-Lacquered Surfaces and Slip-On Lid

The L479 model has gold lacquer on its inner and outer surfaces. It uses a slip-on lid and a mechanically joined body. No handle, hinge, seam coating or additional rib is specified. The wider EA family also lists decorative ribs and different finishes, including silver, pigment, clear lacquer and enamel. Offset printed outer surfaces are another family-level option. However, these alternatives must not be treated as standard features of L479. For tea and coffee packaging, food-contact suitability of the inner lacquer, closure fit and the ability to protect against moisture or aroma loss should be tested. A slip-on lid alone does not guarantee airtight packaging.

Wholesale Tea-Coffee Boxes and Custom Printing

When sourcing tea and coffee metal boxes in bulk, check finished dimensions, closure design, coatings and shelf presentation together. Kontensan has manufactured metal packaging since 1980. Its facilities in Konya and Istanbul have a combined 25,000 square meters of indoor production space. Metal offset printing equipment supports requests for custom printed tea and coffee boxes in suitable configurations. The company exports to more than 30 countries. Order prices depend on sheet thickness, printing, coatings and quantity. For a technical quotation, provide the filling product, target weight, packaging artwork and required closure performance.

Frequently Asked Questions - FAQ

What is the finished height of the one-liter tea-coffee box?

L479 is 125 mm high. The 36 mm family value is not the finished model height.

Which lid and lacquer does this tea-coffee box use?

L479 has a slip-on lid, gold lacquer on both surfaces and a mechanically joined body.

Can the tea-coffee box have custom printing?

The EA family lists offset printed exteriors. Printing and food-contact requirements must be confirmed for L479.
