Product Description

1 Liter Vegetable Oil Tin Can KA

The 1 Liter Vegetable Oil Tin Can is a seamed metal oil tin that stands out with its low-profile, wide-based form, made for small-volume filling. With a Ø83 mm diameter and just 37 mm height, it suits fill volumes ranging from 0.2 to 1.5 liters. This product belongs to the Vegetable Oil Tin Can series under Kontensan's Food Tin & Metal Packaging main category.

Who Is the 1 Liter Vegetable Oil Tin Can Suitable For?

With its low disc form, this oil tin suits premium and boutique oils, sample presentations, and gift sets. Its low profile is an advantage in presentations that need limited height on the shelf or in a box. It can be produced for liquid oils such as sunflower, corn and olive oil; the food-grade internal coating keeps the oil fresh.

Coating and Printing Options

This oil tin can be produced with a wide range of internal and external coatings such as silver lacquer, gold lacquer, pigment lacquer and enamel. A single Ø32 practical or vented cap gives controlled pouring for low-volume products. With metal offset printing, a custom brand design is applied to the wide top surface.

Durability and Food Safety

Seam coating options and food-grade lacquer systems support leak resistance and hygiene throughout the shelf life.

Kontensan Production Assurance

Kontensan supports production reliability with its quality, environmental, and food safety management system certifications. With 46 years of manufacturing experience, it supplies oil tins from Türkiye to more than 30 countries. Alternative moulds, such as a 200 mm tall 1 liter oil tin, can also be produced to fit your needs.

Frequently Asked Questions - FAQ

How many kilograms of oil does a 1 liter oil tin hold?

Liquid oils have a density of about 0.91 kg per liter, so 1 liter of oil weighs roughly 0.9 kg. The tin suits a 0.2–1.5 liter fill range, so the weight varies with the fill amount.

How does the form of this 1 liter vegetable oil tin can differ from others?

The KA mould is a low-profile, wide-based disc form; with a height of just 37 mm, it suits low-height presentations.

What is the lowest fill volume?

The fill range goes down to 0.2 liters, which also makes it suitable for very small premium and sample presentations.

Is it suitable for olive oil?

Yes. Thanks to its food-grade internal coating options, it is suitable for olive oil and other liquid vegetable oils.
